#### PREFACE

A detailed study of important ancient historical sites is greatly needed. In this monograph an attempt has been made to give an exhaustive and systematic account of Rājagriha, one of the most important ancient Indian cities, from all the available literary sources, Brahmanical, Jain and Buddhist. I may draw the readers' attention to the map of Rājagriha published in the Archaelogical Survey Report for 1905-06. I am grateful to Rao Bahadur K. N. Dikshit, M.A., Director-General of Archæology in India, for kindly asking me to undertake this work. I trust that this treatise will be found useful by those for whom it is intended.

### RĀJAGRIHA IN ANCIENT LITERATURE

#### 1 DIFFERENT NAMES: THEIR ORIGIN AND SIGNIFICANCE

Kuśāgrapura,¹ Girivraja² and Rājagriha³ (Pali Rājagaha, Ārddha-Māgadhi Rāyagiha) are the three familiar names by which the ancient and earlier capital of Magadha⁴ is known in ancient literature. Kuśāgrapura, which is represented by Jinaprabhasūri as the earlier name of Rājagriha,⁵ cannot be traced in any of the Pāli or Ārddha-Māgadhi works. Hwen Thsang transliterates this name in Chinese as Kū-shê-ka-lo-pu-lo, which Julien wrongly restores by Kuśāgārapura or 'Palace of the Kuśa house'.⁶ Watters who restores it by Kuśāgrapura observes: "The translation shang-mao, 'superior reed-grass' apparently supposes the word Kuśāŋra''.¹ According to the Chinese pilgrim's itinerary, "the city derived its name from the excellent fragrant reed-grass which abounded there''.ঙ

As for the second name Girivraja, its origin or significance is not far to seek. The city was called Girivraja because it was 'guarded by a cluster of close-set five hills'. Buddhaghosa explains the Pali Giribbaja as meaning 'an enclosure of hills'. Thus Girivraja may be taken to simply mean 'a hill-girt city'.

The third name Rājagriha, which literally means a 'royal abode', 'royal residence', or 'royal seat', is thus accounted for by Buddhaghosa: "Rājagaha is a town so named. It is called Rājagaha because it was used as a residence (lit. seized) by Mandhātā, Mahāgovinda, and the rest. But as others explain it, Rājagaha is just a name chosen for the town concerned". Dhammapāla refers to another opinion accounting for the name Rājagaha as a prison for inimical kings (paṭirājūnam gahabhūtattā). 12

<sup>&</sup>lt;sup>12</sup> Udāna-vannanā, Siamese Ed., p. 32. Cf. Bhāgavata Purāna, X, Ch. 7, according to which king Jarāsandha imprisoned several bings in Rājagriha.

According to Jinaprabhasūri, the city which eventually came to be called Rājagriha was known from time to time by such earlier names as Kshitipratishtha, Chaṇakapura, Rishabhapura, and Kuśāgrapura, the first three of which are not met with elsewhere, in Buddhist or Brahmanical literature. We come across two other names of the ancient city, namely Vasumati in the Rāmāyaṇa² and Bārhadrathapura in the Mahābhārata.³

#### 2 GENERAL DESCRIPTION AND TOPOGRAPHY

The Mahābhārata (Sabhāparva), which professes to give an earlier account of Rājagriha4 when it was used as the capital by king Jarāsandha and known by the name of Girivraja, describes the royal city as one guarded by five close-set hills with large peaks. The five hills with which this beautiful royal city was girt and made impregnable on all sides (durādharsham samantatah) were Vaihāra, the large mountain (vipulah śailo), Vārāha, Vrishabha, Rishigiri, and Subhachaityaka.5 The five hills around the city, as named in a second enumeration, were Pāṇḍara, Vipula, Vārāhaka, Chaityaka, the best of mountains (giriśreshtha), and Mātanga, the rocky elevation (silochchaya).6 This capital of Magadha which 'might have a view' by persons from a distance from the Gorathagiri7 (modern Barabar hills)8 lay concealed, as it were, in lodhra (racemosa) trees adorned all over with fragrant and delightful blossoms. It also abounded with the beautiful groves of Pippala trees. It was the place where once dwelt such holy personages as Rishi Dîrghatamas, the high-souled Gautama, and the sage Käkshīvān. It was again the place that contained the excellent abodes of Svastika and Maninaga, the two serpents that tormented the enemies. On the five great hills, Pandara, Vipula, Vārāhaka, Chaityaka, and Mātanga, were the abodes of all siddhas, the hermitages of anchorites and high-souled munis, and the haunts of powerful bulls, Gandharvas, Rākshasas, and Nāgas. The hot springs, famous as Tapodās,9 were praised by all siddhas as punyatīrthas (holy waters for purificatory baths).10 Maninaga was the tutelary deity of the place, while the yakshinis were the minor deities of appreciable importance.11 It was then a flourishing city, populous and

Hwen Thang's explanation of the origin of the name Kusagrapura may not at all be correct. See passim.

<sup>3</sup> II. 24. 44.

<sup>&</sup>lt;sup>4</sup> Though the account given refers to an earlier state of things, it is highly improbable that, as one has it, it is earlier than that contained in the Pali Canon. The neighbouring hill which is called Gorathagiri has been named Khalatiká (Bald) in the inscriptions of Ašoka as well as the Mahābhāshya of Patanjali (Corpus Inscriptionum Indicarum, New Series, Vol. I).

prosperous, where men of four castes lived. The royal palace was inside the city. Vāsudeva of the Vrishņi race and the five Pāṇḍava brothers followed a route by which they were able to reach the beautiful and majestic Chaityaka hill from Gorathagiri. It was from the top of this hill that they took a full view of the city before entering it by the gate.<sup>1</sup>

The Pali Isigili-Sutta agrees with the Mahābhārata in so far as it says that Rājagriha, or better its antonagara (the inner city), was surrounded by five hills.2 But the hills themselves are named somewhat differently: Vebhara, Pandava, Vepulla, Gijjhakūţa, and Isigili. Judged by their verbal correspondences, Vebhāra and Isigili are same names as Vaihāra and Rishigiri of the first list of the Mahābhārata and Pāṇḍava and Vepulla are no other than Pāṇḍara and Vipula of the second list of the Great Epic. Unfortunately the Epic description has not a word of explanation as to why the five hills were differently named in the two lists presented in one and the same chapter of the Sabhāparva, nor does it give any indication whatsoever as to how they were to be located or identified. The interest of the Buddhist account in the Isigili-Sutta lies in the fact that it introduces the enumeration in such a manner as to enable the reader to locate the five hills in succession, paţipāţiyā as Buddhaghosa would say.3 If one is to take that the list of five hills opens with Isigili, it closes with Gijjhakūţa, and if it opens with Vebhāra, it must close with Isigili. But the question still remains open how to identify them with the modern hills that enclose Rajgir, or better Purāna Rajgir?

The Jaina records and traditions, earlier as well as later, are mainly responsible for the modern nomenclature of the hills around Rajgir. If one enters Rajgir from the north, the hill which lies to the right is Vaibharagiri; that which lies to the left is Vipulaparvata or Vipulagiri; the one which stands at right angles to the Vipula and runs southwards parallel to the Vaibhāra is Ratnagiri; the one forming the eastern extension of the Ratnagiri is Chhathagiri and the hill that stands next to Chhathagiri in continuation of the latter is Sailagiri. The one opposite to the Chhathagiri is Udayagiri; that which lies to the south of Ratnagiri and the west of the Udaya is Sonagiri. The Vaibhāragiri extends southward and westward ultimately to form the western entrance of Rajgir with the Sonagiri. The Vipula-parvata runs for some length towards the south-east leading to the northern range of hills that extends up to the village called Giriyak or Giryek on the Bihar-Sharif-Nawadah road. The Ratnagiri stretches southward for some distance and then bends eastward, the eastern hills, Chhathagiri and Sailagiri extending towards north-east forming the northern range of Rajgir hills. The Chhathagiri and the Sailagiri form the eastern entrance of Rajgir with the Udayagiri which latter, too, continues eastward as the southern range of Rajgir hills. The Udayagiri in its turn forms the southern entrance of Rajgir with the Sonagiri. The Sonagiri extends further west or southwest to form the western entrance of Rajgir with the Vaibhara hill which stands in front of it

<sup>1</sup> Sabhāparva, Ch. XXI, vv. 16-25.

<sup>&</sup>lt;sup>2</sup> Majjhima-nikāya, Vol. III, pp. 68 foll. Cf. Sutta-nipūta Commentary, II, p. 383.

<sup>3</sup> Papancha-sudani, Siamese Ed., Pt. III, p. 537 : etesu pana pubbatesu patipatiya kathiyamanesu.

(Plate Ia). The Rajgir hills forming two parallel ranges, northern and southern, run north-east over a distance of 9 miles and terminate at the village of Giriak. Cunningham says: "From the neighbourhood of Gaya two parallel ranges of hills stretch towards the north-east for about 36 miles to the bank of the Panchana river, just opposite the village of Giryek. The eastern end of the southern range is much depressed, but the northern range maintains its height, and ends abruptly in two lofty peaks overhanging the Panchana river. The lower peak is crowned with a solid tower of brick-work, well known as Jarasandhakā-Baithak, or Jarāsandha's throne (Plate Ib), while the higher peak on the west, to which the name of Giryek peculiarly belongs, bears an oblong terrace ".1

In the inscriptions of the Jaina temples on Mt. Vaibhāra, the name of the hill is 'sometimes written Vaibhāra, and sometimes Vyavahāra',2 It is apparently the same mountain as Vaihāra, which is described in the Mahābhārata as a vipula śaila, or 'massive rock'. According to Jinaprabha-sūri, the city of Rājagriha shone forth in the valley of Vaibhāragiri3 with Trikūṭa, Khandika, and the rest as its bright peaks.4 The Jaina author speaks of some dark caves in this hill that could not be entered without much difficulty (tamaskanda-durvigāhaguhā). He refers to this sacred hill as the site where one might be easily inclined to build kundas of tepid and cold water (tapta-sitambu-kundani). Close to this hill were the Sarasvati and many other streams flowing with pleasant waters with properties to heal diseases, and they served as so many popular tirthas (bathing places). The Saugatas (Buddhists) built vihāras on this hill, finding it to be a suitable site (pratideśa), and the Jainas installed the images of the holy Arhats (Tirthankaras) in the chaityas (shrines) built upon it. 5 As Cunningham thought, 'this hill is beyond all doubt the Vebhara of the Pali annals'.6 But what is the actual literary evidence to justify this identification?

The only difficulty in the way of this identification arises from the fact that Hwen Thsang has definitely represented the mountain as Pi-pu-lo, which verbally equates with Vipula. He tells us that "to the west of the north gate of the 'Mountain City' was the Pi-pu-lo (Vipula) mountain". "According to local accounts", he adds, "on the north side of the south-west declivity there had once been 500 hot springs,7 of which there remained at his time several scores, some cold and some tepid. The source of these springs was the Anavatapta Lake to the south of the Snow Mountains, and the streams ran underground to this place. The water was beautifully clear, and it had the same taste as that of the Lake. The fountain stream flowed in 500 branches past the Small Hot Wells, and this made the water of the springs hot. All these springs had carved

i Cunningham's Ascient Geography, pp. 539-540.

<sup>&</sup>lt;sup>4</sup> Ibid, p. 530.

<sup>&</sup>lt;sup>3</sup> Vividha-Ertha-kalpa, Vaibhäragiri-kalpa, v. 13: Upotyakäyam asyadrer bhati Råjagriham puram. · Ibid, v. 5: Trikūļa-Khandikādini bringānyasya chakāsati.

<sup>&</sup>lt;sup>5</sup> Cunningham's Ancient Geography, pp. 530-1. D. N. Sen is of the same opinion.

Watters' Yvan Chwang, II, p. 153. The pilgrim tells of the mountain to the north of Rajagaha with twenty hot springs at its base. The Chinese ambassador Wang Hsuan (or Yuan)-tse, a contemporary of Hwen Thsang, washed his head in one of these springs. Watters' Yuan Chwang, II, p. 154.

stones such as heads of lions or white elephants, or they had stone aqueducts to lead the water into tanks made of stone slabs. People came from various lands to bathe in these tanks, and often went away healed of old maladies. About the springs were the foundations of topes and temples in close succession, and also the sites of sitting and exercise places of the Four Past Buddhas. This place having a succession of hill and stream was a hermitage of benevolence and wisdom, and in it were hidden many scholars unknown to the world. To the west of the Hot Springs was the Pi-po-lo (Pippala) cave in which the Buddha often lodged. Through the rock at the back of this was a passage into the Asur's Palace in which bhikshus practising samādhi lodged notwithstanding the strange sights which drove some of them mad . . . . . On the Vipula Mountain is a tope on the spot where the Buddha once preached; many Digāmbaras now lodge here and practise austerities incessantly; they turn round with the sun watching it from its rising to its setting."

This is undoubtedly a vivid and correct description of the main features of the Jaina Vaibhāragiri as it is found even now. None need be surprised when the great Chinese pilgrim represents the Jaina Vaibhāragiri as Pi-pu-lo in view of the fact that even the Great Epic describes Mount Vaihāra as vipula śaila. That this very mountain is the Vebhāra of the Pali records is indeed beyond all doubt. In accounting for the name of Tapodārāma, a Buddhist retreat or monastery in Rājagriha of the Buddha's time, Buddhaghosa suggests that it received its name from Tapoda, a hot-water lake about which it was situated. Tapoda is the name of the stream which flowed into and fed the Tapoda lake. The Pali scholiast adds by way of a further explanation of the name!

"Underneath the Vebhāra mountain is the residence of the terrestrial Nāgas which extends over a space of five hundred leagues and resembles the world of the gods in being adorned with jewelled floor and pleasaunces and gardens. There is a big lake of water on the sporting ground of the Nāgas. The river Tapodā flows heated therefrom, as a stream of hot water. But how is it so? Surrounding Rājagaha stands a large under-world. There this Tapodā passes between two big boiling purgatories. From this circumstance the river flows heated. The Blessed One said, 'When, O monks, this Tapodā begins to flow, the water of that lake is excellent, agreeable, cool,..., but this Tapodā, O monks, passes also between two great purgatories. For this reason this Tapodā flows heated.' A big lake of water came to be formed thereby in front of this retreat".3

<sup>1</sup> Watters' Yuan Chwang, Vol. II, pp. 153-4.

<sup>&</sup>lt;sup>2</sup> Sāratthappakāsini, I, p. 38: Tapodārāme, ti Tapodassa tattodakassa rahadassa vasena evam laddha-nāme ārāme.

Säratthapakäsini, 1, p. 38: Vebhära-pabbatassa kira hetthä bhummatthaka-nägänam, paäca-yojana-satikam nägabhävanam devaloka-sadisam manimayena talena äräm' uyyänehi ca samannägatam. Tattha nägänam kilanatthäne mahä-udaka-rahado. Tato Tapodå näma nadi sandati kuthitä un odakä. Kasmä pan' esä edisä? Räjagaham kira pariväretvä mahä-petaloko titthati. Tattha dvinnam mahä-lohakumbhi-nirayänam antarena ayam Tapodä ägaehchati. Tamä kuthitä sandati. Vuttam pi c'etam: "Yadäyam, bhikkhave, Tapodä sandati, so rahado accodako sätodako sitodako ..... api cäyäm, bhikkhave, Tapodä, dvinnam mahä-nirayänam antarikäya ägaehchhati. Tenäyam Tapodä kuthitä sandati". Imassa pana ärämassa abhimukhatthäne tato mahä-udaka-rahado jäto.

While Buddhist writings mention Tapoda as a hot river, the Great Epic, as we saw, uses tapodah as a plural form to denote the hot springs in the neighbourhood of Rajagriha. Watters rightly guessed that the Pali Tapoda and the Chinese T'a-pu-ho might be taken to represent the 'hot springs' of Hwen Thsang.1 Here our immediate interest lies in the fact that Buddhaghosa associates the hot springs giving rise to the Tapoda river with Mount Vebhara.

If it can thus be established that the Pali Vebhāra mountain is no other than the Jaina Vaibharagiri, it becomes easy to identify the remaining four hills with the aid of the list of five hills as mentioned in order in the Isigili-Sutta; Pāṇḍava with Vipula mountain, Vepulla with Ratņagiri2 and Chhathagiri,3 Gijjhakūța with Udayagiri, and Isigili with Sonagiri.4

In the Samyutta-Nikaya the Vipula or Vepulla is described as the best among the mountains of Rajagaha.5 Regarding this mountain we are told in the same Nikāya that it lay to the north of Gijjhakūṭa and stood in the midst of the girdle of Magadhan hills.6 Going by this description one must see that the mountain with which the Vepulla of the Pali records is identified satisfies this two-fold test: (1) that it stands to the north of Gijjhakūṭa, and (2) that it is placed in the circle of hills. The Jaina Vipula mountain does not certainly satisfy these two tests. But the Ratnagiri and the Chhathagiri, taken together and counted as one hill, stand these tests.

D. N. Sen has availed himself of a statement in the Sutta-nipāta commentary in identifying the Pandava mountain with the Ratnagiri.7 According to this statement Siddhartha travelled just a week after his renunciation from the mango-grove of the Mallas at Anupriyā to Rājagriha which stood like a 'fortress' between five hills. He entered the city by its eastern gate and walked up the Pāndava mountain8 where he sat down in a slope facing the east (puratthābhimukhapabbhāre).9 The expression puratthābhimukha can by no means be taken to suggest with Sen that the slope 'lay to the east'.10 And if we look into the text of the Sutta-nipāta, we find it altogether silent as to the gate by which the Bodhisattva entered the city. All that we are told in it is that on his arrival at Rajagriha the Bodhisattva went about the city collecting alms, and on coming out of it walked towards the Pandava hill, thinking that it would be his dwelling place. 11 Seeing that he took up his abode there, the messengers of king Bimbisara

Watters' Yuan Chunng, II. p. 148.

D. N. Sen identifies Vepulla with Vipula, and Pandava with Ratnagiri.

<sup>&</sup>lt;sup>3</sup> Sir John Marshall identifies Gijjhaküţa with Chhathāgiri. See his 'Rajgir and its Remains' in A. S. I. R., 1905-06,

<sup>\*</sup> Cunningham identifies Isigili with Ratnagiri. Ancient Geography, p. 531.

<sup>11</sup> Sutta-nipāta, p. 73 : So pindachāram charitvā nikkhamma nagarā muni Pandavom abhihāresi, etthavāso bhavissati,

informed him, saying: "This bhikkhu, O great king, remains seated in front of the Pāṇḍava hill, like a tiger, or a bull, or a lion in the cavern of a mountain." The Jātaka-Nidāna-kathā definitely tells us in this connection that the Bodhisattva came out of the city by the same gate by which he entered it and sat down facing the east under the shade of the Pāṇḍava mountain and took his meal.<sup>2</sup>

Thus in the Nidāna-kathā, too, the gate by which the Bodhisattva entered the city and came out of it is not mentioned. It agrees with the Sutta-nipāta also in stating that he had not walked towards the Pāṇḍava hill until he came out of the city. Further, if the Bodhisattva had travelled from Anupriyā to Rājagriha, presumably by the high road which passed through Nālandā, it is more probable that he entered the city by its north gate, in which case it is the Jaina Vipulagiri rather than Ratnagiri that fits in with the description of the Bodhisattva's first visit to Rājagriha which was the Girivraja of Magadha.

The Vebhāra and the Pāṇḍava appear indeed to have been the two hills that stood on the north side of Girivraja and were noted for their rocky caves.3

All the available Pali records attest beyond all doubt that the palace of the king of Magadha of Buddha's time was situated in Girivraja, within the girdle of five hills. King Bimbisāra was able to see from his palace when the Bodhisattva was collecting alms from door to door within this part of the ancient city. Buddhaghosa speaks indeed of anto-nagara and bahi-nagara, the 'inner city' and the 'outer city' of Rājagriha, each of which contained a large population, nine crores of people as he would say. The Pali scholiast also informs us that the city of Rājagriha was provided with 32 large gates and 64 small gates. He also tells us that it was enclosed by a wall (pākāra). There were localities on all sides of the city (Rājagahassa samantā). The locality which lay to the south of the southern line of hills was known by the name of Dakkhinagiri (Dakshinagiri).

The happy reminiscences of the sites of importance to the Buddhists in and about Rājagriha are vividly recorded in the Mahāparinibbāna-suttanta in the following words of the Buddha: "Whilst I dwelt once in Rājagaha on the Gijjhakūṭa mountain, whilst I dwelt once in Rājagaha in the retreat called Nigrodhārāma, there verily I dwelt in Rājagaha on the precipice called Chora-

Vinaya Pitaka, Vol. I, pp. 79.80.

papāta. There verily I dwelt in Rājagaha in the Sattapaṇṇa or Sattapaṇṇi cave on one side of the Vebhāra mountain. There verily I dwelt in Rājagaha on Kālasilā on a side of the Isigili mountain. There verily I dwelt in Rājagaha in Sītavana in a slope of the hill called Sappasoṇḍika-pabbhāra. There verily I dwelt in Rājagaha in the retreat called Tapodārāma. There verily I dwelt in Rājagaha on the site called Veluvana Kalandaka-nivāpa. There verily I dwelt in Rājagaha in Jīvaka's Mango-grove. There verily I dwelt at the Madda-kuchchhi Deer-park''.

"Delightful is Rājagaha, delightful is the Gijjhakūṭa mountain, delightful is the Gotama-nigrodha, delightful are the Chora-papāta, the Sattapaṇṇi-guhā on a side of the Isigili mountain, the Sappasoṇḍika-slope in Sītavana, the Tapodārāma, the Veļuvana Kalandaka-nivāpa, the mango-grove of Jīvaka, and the Madda-kuchchhi Deer park.\(^1\)

The Vinaya Chullavagga (IV. 4) contains another interesting list of the Buddhist sites of importance in and about Rājagṛiha which excludes the name of Nigrodhārāma and Veluvana Kalandaka-nivāpa of the above list but includes three new names:—Gomata-Kandarā, Tinduka-kandarā, and Topoda-kandarā.<sup>2</sup>

To these may be added a few other names met with in the Pali Canon and the rest of Buddhist literature:—

Pippali-guhā,<sup>3</sup> Kapota-kandarā,<sup>4</sup> Sappinī-tīra,<sup>5</sup> Indakūţa,<sup>6</sup> Paṭibhāṇakūṭa,<sup>7</sup> Ambasaṇḍā,<sup>8</sup> Vediyaka-pabbate Indasāla-guhā,<sup>9</sup> Paribbājakārāma of Udumbarikā,<sup>10</sup> Laṭṭhivana,<sup>11</sup> Pāsāṇaka-chetiya,<sup>12</sup> Nālakagāma,<sup>13</sup> Varaka,<sup>14</sup> Nālandā,<sup>15</sup> Pāvārika-ambavana,<sup>16</sup> Pāṭaligāma,<sup>17</sup> Rājāgāraka at Ambalaṭṭḥikā,<sup>18</sup> and Ekanālā in Dak-khiṇāgiri.<sup>19</sup>

Gijjhakūṭa (Gridhrakūṭa) was one of the five hills that surrounded Girivraja which was the antonagara (inner area) of Rājagriha. The name does not occur in records other than those of the Buddhists. Buddhaghosa accounts for the name thus:

<sup>&</sup>lt;sup>1</sup> Digha-nikāya, II, pp. 116-7: "Ramaniyam Rājagaham, ramaniyo Gijjhakūlo pabbato, ramaniyo Gotama-nigrodho, ramaniyo Chora-papāto, ramaniyo Vebhāra-passe Sattapanni-guhā, ramaniyo Isigili-passe Kālasīlā, ramaniyo Sitavane Sappasondikapabbhāro, ramaniyo Tapodārāmo, ramaniyo Veluvane Kaļandaka-nicāpo, ramaniyam Jīvabamba-vanam, ramaniyo Maddakuchchhismim migadāyo.

The mountain was called Gijjhakūta or 'Vulture-peak' either because it had a vulture-like peak or because the vultures used to dwell on its peak. As for its topography, we are told that it stood to the south of Vepulla,2 that it could be 'approached from the eastern gate of the city3,' that Jīvaka's mangogrove stood between it and the city-wall4, that the Buddha used to take his daily exercise at its back 'in the western shade' between two peaks5, that the Kālasīla on a side of Isigili was so situated in front of it that a person could easily watch from it the action of certain other persons on the formers and that the Deerpark at Maddakuchchhi lay near about it?.

The Nigrodhārāma, otherwise called Gotama-nigrodha, was, as its name implies, a retreat marked by the presence of a banyan tree. It was situated somewhere at Rājagaha. Its location cannot be determined in the absence of any information on the point.

The Chora-papāta was, as its name signifies, a precipice of a hill of Rājagaha from which the thieves or condemned criminals were thrown down. tion of the precipice is still unknown.

The Sattapanni or Sattapanna cave on a side of Vebhara is the historical site where the First Buddhist Council was convoked. The cave evidently derived its name from the Saptaparna or Saptaparni creeper which stood beside it, marking it out. The Pali accounts are silent as to the side or slope of the According to the Mahavastu, however, it stood hill on which it was situated8. on the north side, on an excellent slope of the Vaihaya (? Vaihāra) mountain adorned with various trees and a rocky floor9. This agrees with the account of Fa-Hien which, too, places the cave 'on the north of the hill, in the shade." According to Fa-Hien, 'the cavern called Srataparna could be reached by going to the west for five or six li (a mile) from the Pippala cave which, too, stood on the north of the same hill. The same was practically the distance of the cave from the 'Karanda Bamboo garden' which lay to the north-east just 300 paces from the Pippala cave10. Hwen Thsang, apparently in agreement with Fa-Hien, locates the cave "about five or six li south-west from the Bamboo Park, on the north side of the south Mountain in a great Bamboo wood11." If these

accounts be true, it becomes difficult to justify Cunningham's identification of the guhā with the Son Bhāṇḍar cave on a southern slope of the Vaibhāragiri.

Buddhaghosa explains the name Kālasilā as signifying a black rock on a slope or side of Isigili<sup>1</sup>. The rock stood so close to Gijjhakūṭa that it was possible for the Buddha to watch from the latter hill when the Nirgranthas (Jain ascetics) were practising difficult penances there<sup>2</sup>. The name Isigili was evidently a Māgadhī or local form of the Sanskrit Rishigiri, meaning a 'Hermit-hill.' The name in its Prakrit spelling acquired, even in the Buddha's time, a popular etymology, which, though fantastic, is not without some importance of its own: Isi gilatīti Isigili. 'Isigili (Rishigili) is the mountain that swallowed up the hermit teachers<sup>3</sup>.''

Sītavana was the name of a susāna-vana or 'Cemetery-grove'. The site was used for a sivathikā or 'charnel-field' where the dead bodies were thrown or left to undergo a natural process of decay5 or to be eaten and destroyed by carnivorous beasts, birds and worms6. The grove or field was enclosed by some sort of a wall and fitted with doors that remained usually closed during night?. Near by was the Sappasondika-pabbhāra, a snake-hood-like declivity of the neighbouring rock8. The grove evidently lay between the residence of the Banker of Rajagriha and the city on one side, and the declivity, on the other. For it was on coming out of the Banker's house and of the city (nagaramhā nikkhamma) that the Banker Anathapindika came across the cemetery or charnelfield. According to Fa-Hien, the shi-mo-she-na (smasana) stood two or three li (half a mile) to the north of Venuvana, which latter lay 'some 300 paces north of the old town, on the west side of the road '. According to Legge's rendering, Venuvana could be reached by 'going out from the old city, after walking over 300 paces, on the west of the road '.10 There is a perfect agreement between Fa-Hien and Hwen Thsang as regards the location of Venuvana, for the latter pilgrim, too, places the famous monastery 'above one li from the north gate of the Mountain-city '11. Hwen Thsang does not, however, refer to the charnelfield, while Fa-Hien refers to it only 'parenthetically '12. The reference to the śmaśāna on the part of Fa-Hien is relevant as he wanted to locate the Pippalacave, a 'stone-cell' or 'dewlling among the rocks' in relation to Venuvana. Going by the direction given by Fa-Hien, the Pippala-cave was situated on the

north face of Vaibhāragiri, which lay to the south of the śmaśāna. The cave itself stood some 300 paces south-west from the charnel-field. If this is at all correct, we may not go far wrong to suggest that the snake-hood declivity, mentioned in Pali literature in connection with Sītavana, is no other than the spacious slope under a few rock-cut caves on the north face of the Vaibhāra hill, a little to the west of the hot springs and a little to the north below the Jaina temple.

Gomaţakandară, Tinduka-kandară and Tapodakandară are the three sites that served as suitable retreats for Buddhist bhikkhus and accordingly find mention in the Vinaya list. The Tinduka-kandară was obviously a site marked by a natural cavern in the rock made known by a Tinduka tree which grew beside it. And the Tapoda-kandară must have been a similar site with a natural cavern in the rock near some hot springs. It is not improbable that the site is no other than the place called Tapoban. Similarly Gomaţa-kandarā was a site with another natural cavern in the rock.

The Tapodarama was a retreat for the Buddhist monks near about the hot springs, near about the Tapoda stream, near about the Tapoda lake or pool. The hot springs are associated by Buddhaghosa, as we saw, with Vebhara, and the Tapoda lake on which the retreat stood was formed by the water carried by the Tapoda stream. This retreat was completely forgotten, as ably pointed out by D. N. Sen, when the Chinese pilgrims visited Rajagriha<sup>2</sup>. We may readily suppose with D. N. Sen that the Tapoda of Buddhist fame is no other stream than the Sarasvatī. The retreat itself could not be far from the north-gate of the 'inner city', and its site may probably be identified with one at the northeast corner of the Vaibharagiri with a small mound on its south end.

The Veluvana or Venuvana was a charming garden, park or grove at Rājagaha which was surrounded by bamboos<sup>3</sup>. It has accordingly been represented in English by 'Bamboo Garden', 'Bamboo Park', or 'Bamboo Grove', all meaning the same site of the land received as gift for the first time by the Buddha. The fuller name of the site was Veluvana Kalandaka-nivāpa, the second part of the name indicating that here the Kalandakas or Kalakas (squirrels or jays) freely roamed about and found a nice feeding ground<sup>4</sup>. The Buddhist legends differ as to who was the original owner and real donor of the site<sup>5</sup>. But certain it is that in the Pali accounts king Bimbisāra figures as the former owner and real donor of the garden. It is also certain that the site was outside the 'inner city' and 'neither very near nor far from it.' D. N. Sen correctly refers to a Pali story relating how king Bimbisāra was sometime 'compelled to come to the Venuvana-vihāra as he was detained too long waiting for his bath in the Tapoda and found the city gate closed when he was returning after the bath<sup>5</sup>. The

<sup>\*</sup> Rajgir and its neighbourhood, p. 4.

story is important just for the indication that the site was the Tapoda lake and the Tapoda retreat on the north side of Girivraja and near its northern gate. Hien delinitely informs us that the Karanda Bamboo Garden stood to the north of the old city, over 300 paces from the gate, on the west side of the road. The śmaśana or 'charnel field' lay to the north of the vihāra, two or three li from it, while the Pippala-cave was 'a dwelling among the rocks', 300 paces south-west from Venuvana1. Hwen Thsang recording a few other details tells us that the Kalanda Bamboo Park stood 'above one li from the north gate of the Mountaincity.' 'Above 200 paces to the north of the Bamboo Park chapel was the Kalanda Tank now without any water. Two or three li to the north-west of this was an Asoka tope, beside which was a stone pillar.' 'Not far to the northeast from this was Rājagriha city the outer wall of which was utterly destroyed; the foundations of the inner wall stood prominently and were above 20 li (4 miles) in circuit with one gate2.' According to Hwen Thsang, the Pippala cave stood 'to the west of the hot springs' of the Pi-pu-lo (i.e., Vaibhāra) mountain3. Thus combining the two accounts, we must locate the site of Kalanda Venuvana 300 paces or one li from the north gate of the 'inner city', half a mile south of the smašāna, 300 paces north-east of the Pippala cave in Mt. Vaibhāra, and 200 paces to the south of the Kalanda Tank. We should thank the Chinese travellers if they had not confused the Tapodarama, at least partly, with Venuvana.

The next site claiming our attention is Jīvaka-ambavana. Jīvaka converted the orchard into a vihāra and made a gift of it to the Buddha and his order. The Pali Sāmañnaphala-Sutta tells us that king Ajātasattu of Magadha had to go out of the city of Rajagaha in order to reach this orchard. The Sutta is silent as to the route or direction followed by the king. He was escorted, of course, by Jīvaka4. In the commentary, however, Buddhaghosa informs us that the king proceeded by the eastern gate of the city the 'inner city of Rajagaha'. under the cover of the Gijjhakūṭa mountain, because the Mango-grove stood somewhere between this mountain and the citywall5. It was nearer to Jivaka's residence than Venuvana6. Fa-Hien places it at the 'north-east corner of the city in a (large) curving (space)7.' Hwen Thsang, too, locates the site 'in a bend of the mountain wall', north-east from the (old) city8. According to Watters' suggestion, based upon a Chinese account in the Fo-shuo-sheng-ching, Ch. II, the orchard 'was apparently in the inclosure between the city proper and the hills which formed its outer defences on the east side9.'

The Deer-park at Maddakuchchhi was another important site in or about Rājagaha. Buddhaghosa takes Maddakuchchhī to be the actual name of the

park where the antelopes were allowed to live freely, without fear, and offers the following fanciful explanation for the origin of the name: "The park came to acquire the name Maddakuchchhī or 'Rub-belly' from the circumstance that here Bimbisara's queen, mother of Ajatasattu, tried to cause abortion with a view to killing the inimical child in the womb by getting her belly rubbed1." But the Pali statement, ramaniyo Maddakuchchhismim migadayo, 'delightful is the Deer-park at Maddakuchchhi,' leaves no room for doubt that Maddakuchchhi itself was not intended to be the name of the park concerned. The import of this descriptive name is that the Deer-park was situated either near Maddakuchchhī or within it. We have reason to suspect that Maddakuchchhī2 was somehow only a Prakrit form of Sanskrit adri-kukshi3, which has the same meaning as the Pali pabbata-kuchchhi, 'a curve in the hill'. The site was apparently on the plains and occupied a space near a curve in one of the hills of Rājagaha. It must have been very near to Gijjhakūţa, otherwise there is no reason why the bhikkhus should think of carrying the Master in a stretcher to it4 after he had got hurt by a piece of stone. The site of this ancient park is probably no other than a large enclosed space to the west of the Udayagiri and placed at a curve of the eastern end of the Sonagiri, on its northern side, at a south-east corner of Rajgir.

The Pippali-guhā or Pipphali-guhā was a solitary cave which became a favourite resort of Mahākassapa<sup>5</sup>. There are some later Pali accounts that show that the cave was used by the great Thera only for meditation<sup>6</sup>. Fa-Hien knew it to be 'a dwelling among the rocks...in which Buddha regularly sat in meditation after taking his (midday) meal '<sup>7</sup>, while according to Hwen Thsang it was a cave 'in which the Buddha often lodged<sup>8</sup>.' The Pali works record only one instance of the Buddha's presence at this cave when he went to see Mahākassapa when the latter fell seriously ill<sup>9</sup>. As explained by the Pali scholiasts, the cave was called Pippali or Papphali because it was marked by a Pippali or Pipphali tree which stood beside it<sup>10</sup>. Both Fa-Hien and Hwen Thsang have represented it as Pipphala-guhā or 'the Pipphala cave.' This name is also not unknown to Buddhist works in Pali<sup>11</sup>, and Sanskrit<sup>12</sup>. It would seem that the tree which

<sup>&</sup>lt;sup>1</sup> Söratthappakäsini, I, p. 77: Maddakuchchhismin ti eramnämake uyyäne. Tamhi Ajätasattumhi kuchchhigate tassa mätarä, ayam mayham kuchchhigato gabbho rañño sattu bhavissati. marked out the cave was Pippala (Ficus religiosa) rather than Pippali or Pippali. The Pali scholiasts apparently failed to notice that a feminine form of Pippala had to be used to make it square with guhā. The Pali works do not precisely tell us where, in which of the hills of Rājagaha, was the cave situated, but they seem to indicate that it was not far from Venuvana<sup>1</sup>. The Mañjuśrī-Mūlakalpa places it in the Varāha mountain<sup>2</sup>, while, according to Fa-Hien, it was only 300 paces south-west from the Karanda Venuvana, and situated in the mountain which lay to the south of this monastery<sup>3</sup>. In some of the Chinese accounts it is placed 'in the Vulture-peak mountain<sup>4</sup>.' But Hwen Thsang definitely locates it on the Pi-pu-lo (i.e., Vaibhāra) mountain, to the west of the hot springs. He tells us that 'through the rock at the back of this was a passage into the Asur's Palace in which bhikshus practising samādhi lodged<sup>5</sup>. The Asur's Palace mentioned by the Chinese pilgrim cannot possibly be taken to refer to what is now-adays known as Jarāsandha's Baithak<sup>6</sup>. For all that he meant by it was an under-ground hall-like space into which the passage led<sup>7</sup>.

Sumāgadha was the name of a well-known tank, which stood somewhere in the 'outer city' of Rājagaha.<sup>8</sup> From the location suggested in the Pali text it is evident that it was situated near about Gijjhakūṭa. There was a Moranivāpa or 'Peacocks' feeding ground' on the bank of this tank.<sup>9</sup>

The Paṭibhāna-kūṭa was a peak with a 'fearful precipice (subhayānako papāto), in the neighbourhood of Gijjhakūṭa¹o. Buddhaghosa informs us that the Paṭibhānakūṭa was only a boundary rock which looked like a large mountain.¹¹ The Pali scholiast may be so far right when he suggests that the kūṭa marked a boundary, but he has altogether missed the significance of its name Paṭibhāna, 'the echoing'. No other meaning can be reasonably made out of the word Paṭibhāna. Even now there is a peak at the eastern end of the Sonagiri,¹² opposite to the Udayagiri, which echoes the sounds. This is certainly a boundary rock, because the southern gate of the city lies just between it and the Udayagiri, identified by us with Gijjhakūṭa.

The Samyutta-nikāya mentions Indakūṭa as a mountain in the neighbourhood of Rājagaha. On this mountain was the dwelling of Indaka Yakkha,

presumably a prehistorical sanctuary. As Buddhaghosa suggests, either the hill derived its name from the Yakkha or the Yakkha derived his name from the hill. The Sanskrit Indraka is an architectural term, meaning a council-hall. It might be that the abode of the Yakkha concerned was just a hall-like stone-structure, marked by the presence of a sacred tree. The Indakūṭa mountain seems to have been in the neighbourhood of Gijjhakūṭa, and it stood, perhaps, either opposite to or beside the latter.

The Jaina *Uvāsaga-dasāo* refers to the site of an ancient shrine, called Gunasīla in the neighbourhood of Rājagaha.<sup>4</sup> The *Vividha-tīrtha-kalpa*, too, mentions this shrine in the most eloquent terms as a site where Lord Mahāvīra sojourned with his disciples.<sup>5</sup>

Ambasanda (Amrakhanda) is mentioned in the Pali Sakkapanha-Suttanta as a Brahmin village, which was situated to the east of Rajagaha.6 The village was called Ambasanda or 'Mango-tract', because there were mango-tracts not far from it,7 The village which is placed in the text outside the area of Rajagaha but within Magadha is introduced just to indicate the location of the Indasalaquhā in the Vediyaka mountain which stood to the north of it.8 The cave had an Inda-săla tree at its door. As Buddhaghosa informs us, it was a pre-existing cave between two hills. But the particular hill in which it was actually situated was called Vediyaka or Vediya for no other reason than this that it was surrounded on all sides by altar-shaped blue rocks.9 Neither the text nor the commentary refers to any river in the neighbourhood of this hill. Cunningham, as we know, identifies the Vediyaka mountain with Giryek, and the Indasala cave with a natural cavern, called Gidha-dwar, in the southern face of the mountain, at 2 miles to the south-west of the village of Giryek and 1 mile from Jarasandha's Tower (Jarāsandha-kā-Baithak), about 250 feet above the bed of the Bāngangā rivulet.10 According to Hwen Thsang, the mountain in which the cave was situated 'had two peaks' and its 'sombre gorges were covered with vegetation'. It was 'in the precipitous south side of the west peak' that the 'broad low cave ' was to be seen.11 Hwen Thsang's description agrees so far with Buddhaghosa's account that the cave is placed on a site of two peaks or mountains.

and it differs from the latter in so far as it locates the cave on the south side of the west peak instead of between the two peaks. The two accounts may, no doubt, be harmonised if the Pali scholiast's statement be taken to mean that the cave was between two hills, one belonging to the northern range of the Rajgir hills and the other to the southern. It is difficult to accept Fa-Hien's description of the mountain as 'a small solitary rocky hill, at the head or end of which was an apartment of stone, facing the south'.1 There is much truth in Fergusson's opinion that Fa-Hien misunderstood the hill of Bihar-Sarif for the 'Indra's cave mountain'. For going by the description of Buddhaghosa and Hwen Thsang, we are not to look for the cave in a 'solitary small hill' but on a spot between two mountains or in a place where there was a mountain with two peaks.2

Sappinī occurs as the name of a river or rivulet in the neighbourhood of Rājagaha. The Sappinī, as its name implies, was a stream with a winding course. The Buddha used to sojourn occasionally on its bank.3 In one text the location of the river is suggested broadly with reference to the city, and in another we are told that the Buddha walked from the Gijjhakūṭa to the Sappinītīra, which was noted then for a large retreat of the Wanderers.4 If Sappinī be, as one may be inclined to think, no other than the modern Panchana river, we must suppose that it flowed in the Buddha's time on the south side of the city and in its immediate neighbourhood, whereas it has now gone off to the east end of the range of Rajgir hills.

The paribbājakārāma of Udumbarikā was a notable retreat built for the Wanderers in the landed estate of Udumbara-devi in the neighbourhood of Rajagaha and Gijjhakūta.5 It was evidently a few paces from the Mora-nivāpa on the bank of the Sumagadha tank.6

The Latthivana (Skt. Yashtivana) was the name of the royal park of Bimbisara where the Buddha arrived from Gayasisa (the main hills of Gaya) and halted with the Jatila converts on his way to the city of Rajagriha.7 The Latthivana was just a 'palm-grove' (tāluyyāna) according to Buddhaghosa.8 The grove which was situated in the outskirts of the city of Rajagaha (Rajagahanagarupachare) was considered 'far away' (atidure) as compared with Venuvana. The distance between the city and the palm-grove by a road which connected the two places is said to have been 3 gavutas (6 miles).10 The grove was noted in

the Buddha's time for a 'Banyan shrine', called Suppatitha-chetiya. There is little doubt that the site lay to the west or south-west of Rajagaha.2 The Mahāvastu locates it in the interior of a hill (antagirismim).3 Hwen Thsang describes Yashtivana as 'a dense forest of bamboos which covered a mountain', and points out that above 10 li (nearly 2 miles) to the south-west of it were two hot springs.4 But he accounts for the name of the site, Yashtivana or 'Stickwood', by a legend which is 'not in agreement with other Buddhist texts'. As Watters remarks: "These books tell us that when he (the Buddha) proceeded from the neighbourhood of the Bodhi Tree to pay his first visit, as the Buddha, to Rajagriha, he rested on the way in Yashtivana, the Stick (or Staff) wood. As a variant for Yashti we find Lashti, and there are the two Pali forms Yatthi and Latthi. Moreover, we find the place called . . . Subhalatthi with the word for trees added. It is called in the books a garden or park and in others a mountain. In it was a noted shrine called the Supratishtha-chaitya. This Supratishtha (in Pali Supatitha), was the god of a banyan tree in the wood, and the chaitya, at which Buddha lodged, was apparently only the foot of the banyan In one book it is said to be 40 li from Rajagriha, and it was evidently to the west of that city, and not far from it. It is still, according to Cunningham, 'well-known as the Jakhti-ban, which is only the Hindi form of the Sanskrit word' . . . the two Hot springs . . . are still, Cunningham tells us, to be found 'at a place called Tapoban'."5

The Pāsānaka-chetiya (Pāshāna-chaitya) is famous in Buddhist tradition as the place where the Buddha had delivered the Pārāyaṇa Discourses,6 now embodied in the concluding book of the Sutta-nipāta.7 It lay evidently west or south-west of Rājagaha. The Sutta-nipāta commentary informs us that there was formerly a devasthana or 'shrine' on a large stone, which became converted in the Buddha's time into a Buddhist retreat, known by the name of Pāsāņakachetiya or 'Rock-shrine'.8 Sakka is credited with the building of a mahamandapa upon the rock (Sakkena māpita-mahāmandape).9 It was situated in Magadha-khetta (the religious area of Magadha). 10 Dr. Barua who took this rock to be identical either with Gorathagiri (Barabar hills) or some hill near it11 now authorises us to look for it in Hwen Thsang's Buddhavana, above 100 li (19 miles) north-east of the Kukkutapāda (Kurkihar) mountain. The Buddhavana mountain

was, as seen by Hwen Thsang, a rock 'with lofty peaks and closely packed cliffs'. Buddha had rested in a cave in its steep side. At the side of this was a flat stone which Sakra and Brahmā used for grinding Oxhead Sandal. The Yashtivana lay above 30 li (5 miles) to the east of it.<sup>1</sup>

The place where king Ajātaśatru is said to have built a stūpa for the enshrinement of his share of Buddha's relics² is undoubtedly an important site from the Buddhist point of view. Hwen Thsang definitely tells us that this stūpa or tope stood to the east of Veņuvana.³ There grew up among the Buddhists a later legend, according to which, the relics were miraculously collected from almost all the places where they were to be enshrined and deposited in one place at Rājagṛiha. A stūpa was caused to be built by Ajātaśatru at the instance of Mahākāśyapa to keep the relics preserved underground. The structure above ground was, according to Buddhaghosa, a pāsāṇa-thūpa or 'mound of stone'. The Mañjuśrī-mūlakalpa locates the stūpa on the east side of the city of Rājagṛiha and also probably to the east of Veṇuvana,⁵ while Buddhaghosa places it at a south-east quarter of the city (Rājagahassa pāchīna-dakkhina-disābhāge).⁵

The Rājāgāraka at Ambalaṭṭhikā was a garden house of king Bimbisāra. As Buddhaghosa takes it, Ambalaṭṭhikā was an appropriate name for the royal park with a young mango-tree at its door. We should rather think that Ambalaṭṭhikā was the locality where the royal garden house or park was situated. It stood midway between Rājagaha and Nālandā, and was the first halting place on the high road which extended in the Buddha's time from Rājagaha to Nālandā and further east and north-east. 10

The site of the Bahuputta chetiya (a sylvan shrine) is also placed midway between Rājagaha and Nālandā (Samyutta Nikāya, II, p. 220).

Nālandā, which became from the 6th century A.D. a great seat of Buddhist learning, was in the Buddha's time one of the halting stations on the high road connecting Rājagaha with *Pāṭaligāma*, *Koṭigāma*, *Vesālī*, and the rest. Buddhaghosa knew it to be a town at a distance of one yojana (about 8 miles) from Rājagaha.<sup>11</sup> Cunningham identifies the ancient site with the modern village of

Baragaon which lies at the northern end of the precincts of the Nalanda Mahavihāra. The Pali texts, however, refer not so much to Nālandā itself as to Pāvārika's Mango-grove in its vicinity as the real place of importance both to the Buddhists and the Jainas.1 According to the tradition recorded by Hwen Thsang, "in a Mango Wood to the south of this monastery was a tank the dragon of which was called Nalanda and the name was given to the monastery. But the facts of the case were that Ju-lai (Buddha) as a P'usa (Bodhisattva) had once been a king with his capital here, that as king he had been honoured by the epithet Nālandā or 'Insatiable in giving' on account of his kindness and liberality, and that this epithet was given as its name to this monastery".2 The Life of Hwen Thsang places Nālandā above seven yojanas (about 56 miles) northeast from Mahābodhi.3

The Udāna introduces us to Kapota-kandarā,4 which Dhammapāla takes to be the name of a Buddhist retreat.5 He accounts for the name thus: "Formerly the pigeons dwelt in that cavern of the mountain, from which circumstance the cavern came to be called Pigeon-cavern".6 The Pali scholiast does not take into his consideration the fact that Kapota-kandarā occurs as a feminine form of the name. This place is mentioned in the Udana as a locality at some distance from Rājagaha. Fa-Hien on his way from Pāṭaliputra to Rājagriha arrived at a 'small solitary rocky hill', at the head or end of which was an apartment of stone, facing the south. The hill lay some nine yojanas (72 miles) south-east from Pāṭaliputra.7 He inadvertently mistook the apartment of stone for the Indasāla-guhā, so famous in the tradition of the Sakkapanha-Suttanta. It is almost definite that his 'small solitary rocky hill' was no other than the hill at Bihar-Sarif. Hwen Thsang says that a journey of 150 or 160 li (24 or 26 miles) north-east from the Indasala cave brought him to a Buddhist establishment called Kapota or 'Pigeon monastery'. Two or three li south from this monastery was 'a tall isolated hill well wooded and abounding in flowers and streams' and 'on the hill were numerous sacred buildings . . . . executed with consummate art.'8

Pāṭaligāma was a village of Magadha, which lay opposite to Koṭigāma on the other side of the Ganges which formed a natural boundary of the kingdom of Magadha and the territory of the Vriji-Lichchhavis of Vaisālī. The Magadhan village was one of the halting stations on the high road which extended from Rājagaha to Vesālī and other places. The fortification of Pāṭaligāma which was undertaken in the Buddha's life-time by the two Brahmin ministers of Magadha led to the foundation of the city of Pāṭaliputra9 to which the capital of

Magadha was removed by Udāyi or Udāyibhadda, the son and successor of Ajātasattu.

Ekanālā was a Brahmin village in Dakkhinagiri, an important locality which lay to the south of the hills of Rajagaha. A Buddhist establishment was founded at Ekanālā in Dakkhinagiri.1 The Samyutta-nikāya distinctly places it in the kingdom of Magadha, outside the area of Rājagaha.2

Nāla, Nālaka, Nālagāma or Nālakagāma was a village in Magadha, where Săriputta died.3 According to the Mahāsudassana-Jātaka, Sāriputta was born in the village of Nala and died at a place called Varaka.4 Fa-Hien says that a yojana (8 miles) south-west from the 'small solitary rocky hill' (which we have identified with the hill at Bihar-Sarif) was the village of Nala where Sariputra was born and where he attained his parinirvana.3 According to Hwen Thsang, the place of birth and death of Sariputra was known at the time of his visit as Ka-lo-pi-na-ka, town which he places 23 or 24 li (about 4 miles) east and northeast from Kolika (Pali Kolita),6 a village where Maudgalyāyana was born and where he died. The village of Kolika (a town according to Hwen Thsang) itself is located eight or nine li (11 miles) south-west of the Nalanda Monastery.7 The Vimanavatthu Commentarys locates Nalakagama in the eastern part of Magadha.

Manimālaka-chetiya was an ancient sacred site in Magadha on which stood the mansion of Yakkha Manibhadda.9 The shrine was probably no other than a sacred tree in which the yakkha dwelt.

Andhakavinda, Khānumata and Machalagāma are three other localities in Magadha which find mention in Pali literature. Of them, the first was connected with Rājagaha by a cart-road.10

Khānumata was a prosperous and flourishing Brahmin village somewhere in Magadha, where a Vedic institution was maintained on a land granted by king Bimbisāra,11 The garden Ambalatthikā in the vicinity of Khānumata was the place which became the site of a Buddhist establishment.

Machalagama was a well-laid village in Magadha, where the Sun-god and the Moon-god were worshipped by the people. The place was bedecked with roads, rest-houses, tanks and palatial buildings even long before the advent of the Buddha. 12

#### 3 ANTIQUITY AND HISTORY OF RAJAGRIHA

We have seen that according to the Jaina tradition recorded in Jinaprabhasūri's Vividhatīrtha-kalpa, Rājagriha was not the first but rather the last name by which the capital of Magadha came to be known. Of the four earlier Kshitipratishtha, Chanakapura, Vrishabhapura, and Kuśagrapura, mentioned in the Jaina account, one at least, namely, Kuśagrapura, is met with in the Si-yu-ki of Hwen Thsang and the Manjuśri-mulakalpa. Hwen Thsang's suggestion that 'the city derived its name (Kuśāgrapura) from the excellent fragrant reed-grass which abounded there' may be interesting but not true at In two of the names, Kuśagrapura and Vrishabhapura, one may find perpetuated the memory of two earlier kings of Magadha, Kuśagra and Vrishabha, who figure as successors of Vrihadratha in the Matsya-purana dynastic list of The city is certainly named Vasumati after its founder Vasu,2 and Bārhadrathapura after its king Bārhadratha or Jarāsandha.3 The Jaina list of names excludes Girivraja altogether. The Chinese pilgrim, too, does not refer to this name by which the capital of Magadha was known in the Buddha's time and also in earlier times. Girivraja and Rājagriha are indeed the two names by which the capital of Magadha (Magadhapura) has been represented in the Mahābhārata and throughout the Pali Canon, while only one name, Rāyagiha (Rājagriha) is met with in the Jaina Agama,

The ancient or earlier capital of Magadha was traditionally known in the Buddha's time as Magadhānam Giribbajam, the 'Girivraja of the Magadhan people'. Giriparikkhepa—'a girdle of hills', 'an inclosure of hills'—is rightly suggested by Buddhaghosa as being the literal meaning of Girivraja, which was a 'hill-girt city', a 'hill-fortress', or a vraja (fort or pasture) between the hills. The Chinese pilgrims have rightly described the city. According to Fa-Hien it was "a circular space formed by five hills which stand all round it, and have, the appearance of the suburban wall of a city", and according to Hwen Thsang it was "the centre of Magadha and its old capital", "the Mountain-city", with high hills forming its outer walls.

Rājagṛiha was just another name of the capital. But Hwen Thsang would have us believe that this name was strictly applicable to the new city built either by king Bimbisāra or by his son and successor, king Ajātaśatru, not far to the north-east from Venuvana.<sup>6</sup> Fa-Hien, too, speaks of the 'old city' and the 'new city'. By the old city Hwen Thsang distinctly means Kuśāgrapura and by the new city, he means the city which king Ajātaśatru made his capital. Hwen Thsang rightly interprets the name Rājagṛiha as meaning "the king's abode," "the royal seat". The etymological speculations of the Pali scholiasts

over the Pali form gaha of griha, Jama giha, gahabhūtattā patirājūnam, "a risk for the invading kings" point only to the well-guarded position of the ancient

The Jaina Vividha-tīrtha-kalpa speaks of Rājagriha as the residence of such kings and princes as Jarāsandha, Sreņika, Kūņika, Abhaya, Megha, Halla, Vihalla, and Nandishena.1 Of them, Jarasandha was no other than the most powerful king Jarāsandha of the Epic fame, Srenika was the king Seniya Bimbisāra of Pali literature, Kūnika was no other than king Ajātasattu, son and successor of Bimbisara. Abhaya was the same as Abhayarājakumāra, and Megha, Halla, Vihalla, and Nandishena were like Kunika and Abhaya, sons of Bimbisara, presumably by different queens. According to the Jaina Nirayāvaliya-Sutta, Vehalla's mother was a daughter of Cetaka, the then king of Videha,2 while according to Buddhist tradition, Ajātasattu was a son of Bimbisāra by a Videhan queen (Ajatāsattu Vedehīputto).3 The Pali annals clearly attest that Bimbisāra also married Kosaladevī who was a sister to king Pasenadi (Prasenajit) of Kosala.4 There is also mention of Udumbarikā devī, a royal lady, whose relation with Bimbisara is not precisely known. But it is certain that Bimbisara also married Khemā, a daughter of king Madda.5 The Vinaya Mahavagga tells us that Bimbisara had 500 wives.

Kūnika is represented throughout Jaina literature as a king of Anga who reigned in Champā. But the fact is that he was only the uparājā or viceroy of Anga, which formed an integral part of the kingdom of Magadha already during the reign of Bimbisara. There are traditions, however, to show that Magadha was once included in the kingdom of Anga.7 While a Viceroy of Anga, Kūnika-Ajātaśatru, picked up a quarrel with the Vriji-Lichchhavis of Vesālī over the possession of a mineral mine on the boundary of the two terri-The Pali commentatorial tradition says that Ajātaśatru was unable to defeat the Vriji-Lichchhavis on account of their national solidarity and numerical strength.8 So after he had ascended the throne of Magadha, he became bent upon destroying the Vriji-Lichchhavis and uprooting their power. He deputed his minister Varshakara to wait upon the Buddha and have his opinion regarding the future of the Vrijis. On coming to know that the Buddha laid much stress on unity as the source of their national strength, Ajātaśatru employed two of his ministers, Sunīdha and Varshakāra to build a fort at Pāṭaligāma with a view to repel the Vrijis (Pāṭaligāme nagaram māpenti Vajjīnam paṭibāhāya).

The work of fortification of Pāṭaligāma which was witnessed by the Buddha when he passed through this village led eventually to the building of the city of Pāṭaliputra.

As evidenced by the Pali Canon, after the demise of the Buddha, there existed an enmity between the king of Magadha on the one hand, and the Vrijis of Vesäli on the other, the former ultimately gaining victory over the latter. We may take it for certain that the capital of Magadha was transferred to Pātaliputra by Udāyibhadra, the son and successor of Ajātaśatru.

Thus it may be established that Ajātaśatru was the real builder of Pāṭaliputra, which was in fact the new Rajagriha or new capital of Magadha, as distinguished from the old Rajagriha or Girivraja with its outer area.

This tradition became somehow twisted and led the Chinese pilgrims Fa-Hien and Hwen Thsang to speak of the 'old city' and the 'new city' of Rajagriha, both with reference to Girivraja, crediting Ajātaśatru with the building of the 'new city'. Fa-Hien says that a yojana to the west from Nāla, the place of birth and death of Sāriputra, brought him to 'New Rājagriha, the new city which was built by king Ajātaśatru'. There were then two monasteries in it. Three hundred paces outside the It was enclosed by a wall with (four gates). west gate was the stupa erected by Ajatasatru over a portion of the relics of Buddha received by him. Some four li (less than a mile) south from the south gate was the 'old city of king Bimbisara', 'a circular space formed by five hills'.2

According to Hwen Thsang, the Kalanda Tank was above 200 paces to the north of Venuvana, 2 or 3 li to the north-west of this tank was an Aśoka tope, and not far to the north-east from this was 'Rajagriha city the outer wall of which was utterly destroyed; the foundations of the inner wall stood out prominently and were above 20 li (4 miles) in circuit with one gate'. He tells us that 'king Bimbisāra had his capital at Kuśāgrapura which was constantly afflicted by disastrous fires . . . When a fire broke out in the palace he made his heir king, and went to live in the cemetery. Hearing this the king of Vaisali proceeded to invade Magadha, whereupon this city was built, and the inhabitants of Kuśagrapur all removed to it.... But there was another story which ascribed the building of this city to Ajātaśatru whose successor made it his capital.3 It is not a fact that 'Aśoka removed the seat of government to Pāṭaliputra'.4

D. N. Sen has felt the difficulty in accepting the truth in the Chinese pilgrim's story of New Rājagriha without being able to trace its source.5 New Rājagriha or new capital of Magadha was no other than Pāṭaliputra which was built by Ajātaśatru with a view to repel the attacks of the Vrijis of Vaiśālī and made capital by Ajātaśatru's successor Udāyi or Udāyibhadra. be some truth in the suggestion made by Hwen Thsang that the cause of removal of the capital was a fire which broke out in the old capital. Sen has rightly

drawn our attention to a statement in the Majjhima-nikāya that Ajātasattu, the king of Magadha, caused the 'fortifications of the old capital to be repaired as a preparation against a threatened invasion by the king (Chanda Pajjota) of Ujjain '.1 But Ajātasattu might have undertaken to repair the old capital on his accession to the throne as was usual with the kings of ancient India.2

Buddhaghosa speaks of the inner city (antonagara) and outer city (bahina-According to the Rajovada-Jataka, the outer city consists gara) of Rājagaha,3 of the localities at the four gates (chatu-dvāra-gāma).4 Though Buddhaghosa tells us that the city of Rajagaha was fitted with 32 main gates and 64 lesser gates (posterns), the principal gates were really four. According to the Suttanipāta-Commentary, for instance, the Bodhisattva on his first visit to Rājagaha, entered it by the east gate.5 Buddhaghosa informs us that when king Ajātasattu wanted to wait upon the Buddha in Jīvaka's Mango-grove, he was escorted to the place by the eastern gate of the city (pāchīna-dvārena)6. Hwen Thsang distinctly mentions the north gate and a narrow outlet on the west through the high hills.7 The locality at the east gate was apparently a long narrow strip of land between two ranges of hills and it probably extended as far north-east as the Gridhra-dvāra cave. The locality at the south gate was known as Dak-The same locality must have extended as far south-west as the west The locality at the north gate is precisely that which is described by Chinese pilgrims as the 'new city' or 'New Rājagriha'. The new Rājagriha was nothing but a palace-area in the outer city. This area was, according to Fa-Hien, enclosed by a wall with four gates, the west and south gates being distinctly referred to.8 As noticed by Hwen Thsang, this palace-area was enclosed by two walls, the inner wall being 20 li (31 miles) in circuit with one gate. The distance between the south-gate of new Rajagriha (Plate Ha) and the north gate of Girivraja was, according to Fa-Hien, four li (less than a mile). Fa-Hien places the stupa built by Ajātaśatru just 300 paces outside the west gate of new Rājagriha.10 Hwen Thsang places this stūpa to the east and the Kalanda tank above 200 paces to the north of Venuvana. He noticed an Aśoka tope with a stone pillar bearing an elephant two or three li (about half a mile) to the northwest of the Kalanda tank, while the new Rājagriha lay not far to the north-east from the Asoka tope.11 One may rightly assume that this palace-area, the Venuvana, the Kalanda tank, the Tapodarama, and the rest lay all to the east

of the Sītavana or Cemetery-grove which formed the western end of the locality at the north gate of Girivraja. But it is probable that this locality extended north-east along the northern range of Rajgir hills over a pretty long distance. We might say that Latthivana (Yashtivana) or Palm-grove or Bamboo-wood of Bimbisāra was on the outskirt of the bahinagara towards the south-west and the Royal pleasaunce at Ambalatthikā lay on the outskirt of the same towards the north-east.

The road from the east gate of Rājagaha led to a village called Andhaka-vinda. In the vicinity of Gijjhakūṭa was the Sumāgadha tank on the bank of which was a free feeding ground of the peacocks. The landed property of Udumbarikā devī lay near this tank, while the river Sappinī (modern Panchānā) flowed not far from it. There was a famous Brahmin village by the name of Ekanālā in Dakkhinagiri, a locality at the south gate of Rājagaha.

Beyond the bahinagara lay the Magadha janapada which extended as far north-east as Pāṭaligāma and the Ganges and as far south-west as Gorathagiri or Barabar hills. The rājāgāra at Ambalaṭṭhikā, Pāvārika's Mango-grove at Nālandā and Pāṭaligāma were halting places on the high road which connected Rājagaha with Vesālī, Kapilavatthu, Sāvatthī, Kosambī, Ujjenī and Patiṭṭhāna.¹ The Maṇimālaka-chetiya, the Bahuputta chetiya, the Kapota-kandara, the Ambalaṭṭhikā at Khānumata. Machalagāma, and the Pāsāṇaka-chetiya were some of the notable sites in the Magadha janapada. According to the Vinaya Piṭaka, the kingdom of Magadha contained 80,000 villages, all under the sway of king Bimbisāra.² The city of Rājagaha was surrounded by fertile rice-fields that are 'described to have been divided into short pieces and in rows, and by outside boundaries and by cross boundaries '.³

The inner city was the palace-area within the girdle of five hills. This was, according to Fa-Hien, the 'old city of king Bimbisāra, from east to west about five or six li (nearly a mile), and from north to south seven or eight (more than a mile)'. This was, according to Hwen Thsang, Kuśāgrapura, 'the city of the superior reed-grass, the centre of Magadha, and its old capital', with a narrow outlet on the west and a passage on the north 'through the mountain', 'above 150 li (25 miles) in circuit'. We read in the Rāmāyaṇa that 'Vasu the fourth son of Brahmā built Girivraja, the ancient capital of Magadha'. The Brahmapurāṇa tells us that Prithu 'gave Magadha to Magadha being highly pleased with his song in praise of the samrāṭ'. The Mahābhārata mentions Jarāsandha, son of king Brihadratha, as a very great and powerful king of Magadha who reigned in the city of Girivraja or Rājagriha 'well guarded by mountains on all sides'. The Padmapurāṇa says that Jarāsandha,

the great king of Magadha, besieged Mathurā with his large army of twentythree akshauhinis.1 The Vishnupurāna adds that Jarāsandha gave his twodaughters in marriage to Kamsa, the king of Mathura, and that when Kamsa was killed by Krishna, Jarāsandha marched with his army to Mathurā to destroy Krishna with all the Yadavas and attacked Mathura only to be repulsed with a heavy loss.2 In agreement with the account in the Mahabharata the Bhagavata-Purāņa narrates that Bhīma, Arjuna and Krishņa went to Girivraja where Bhīma killed Jarāsandha and Krishna made Sahadeva, son of Jarāsandha, the king of Magadha and released all the kings imprisoned by Jarasandha.3-According to the Santiparva of the Mahabharata, Jarasandha hearing of the valour of Karna, fought with him but was defeated, and being pleased with his great skill in arms, made him the king of the city of Mālinī.4 Adiparva Jarasandha is represented as a reincarnation of Viprachitti, a chief of The Sabhaparva relates that Bhima proceeded again to Girivraja where he forced Sahadeva to pay taxes to him, and that at the Rajasuya sacrifice, Sahadeva was present as one of the vassals of the Pandavas.6 Udvoqaparva shows that at the Kurukshetra battle Dhrishtaketu helped the Pāndavas with the fourfold army.7 And in the Aśvamedhaparva we are told that Meghasandhi, son of Sahadeva, offered battle to Arjuna who defeated him.8

Pargiter has sought to show on the evidence of the Puranas that the dynasties of Magadha and the adjoining countries descended from Kuru's son Sudhanvan. Vasu the fourth in succession from Sudhanvan conquered Chedi from the Yadavas, and also annexed the adjoining countries as far as Magadha. offered to divide his five territories among his five sons, his eldest son Brihadratha took Magadha with Girivraja as its capital and founded the famous Bārhadratha dynasty there.9 According to the Pauranic lists of kings, the successors of Jarasandha, son of Brihadratha, reigned in Magadha for a thousand years, Ripunjaya being the last king of this dynasty. 10 Ripunjaya was killed by his minister Pulika (? Sunika, Munika, Sunaka) who anointed his son Pradyota by force. Five kings of the Pradyota family ruled over Magadha for 138 years,11 after which the Siśunāgas came into power. Siśunāga made Girivraja his own abode'. King Bimbisara who was the fifth in descent from Siśunaga reigned for 28 or 38 years. Ajātaśatru who succeeded Bimbisāra was the king for Aiātaśatru was followed by Darśaka who was the king for 25 or 27 25 years.

After Darśaka, Udāyin became king and made Kusumapura (Pāṭaliputra) his capital, Kusumapura being situated on the south bank of the Ganges.1

The early records of Buddhism open the political history of Rājagaha and Magadha with the reign of king Seniya Bimbisara. The Mahavamsa assigns to Bimbisāra a reign of 52 years, and to Ajātaśatru a reign of 32 years.2 According to the same authority, Ajātaśatru was succeeded by his son Udayabhadda who reigned for 16 years.3 We are definitely told in the Mahavamsa that the Buddha was senior in age to Bimbisara by five years. In the 16th year of his reign the Buddha entered upon his career as a teacher of the dhamma, and in the 8th year of the reign of Ajātasatru he attained mahāparinibbāņa.4 That Udayabhadda or Udāyibhadda was the son and successor of Ajātaśatru is clearly borne out by the Samannaphala-sutta.5

During the reign of Bimbisara and Ajatasatru the city of Rajagaha was at the height of its prosperity. Anga formed an integral part of the kingdom of Magadha. The kingdom of Magadha comprised an area covered by the districts of Gayā and Bhāgalpur. Rājagaha ranked then with Champā, Sāvatthī, Sāketa, Kosambi, and Benares as a city inhabited by many a rich and influential Khattiya, Brāhmana and Gahapati or Banker.6 The Jain texts describe Rājagaha as a city which was rich, happy and thriving.7 It must have lost its glory with the removal of the capital to Pāṭaliputta or Kusumapura by Udāyibhadda, some 28 years after the Buddha's demise. The latter continued to be the capital up to the Maurya reign and after. But the Hathigumpha inscription of Khāravela lifts up the veil for a moment, and shows that when Brihaspatimitra was the king of Magadha and king Khāravela of Kalinga marched towards Magadha after having stormed Gorathagiri, the latter brought a pressure to bear upon Rajagaha (Rājagaham upapidāpayati).8 Rājagaha must have been used by the then king of Magadha if not as a capital at least as a strong fortress against foreign The same Hathigumpha inscription refers to Anga and Magadha as countries united into one kingdom.

The Mahābhārata describes Girivraja or Rājagriha, the capital of Jarāsandha, as a city which had a teeming population and was noted for the hot springs According to this Epic, the city lay concealed in fragrant Lodhra forests and abounded with the Pippala and Nyagrodha trees. Jinaprabha-sūri tells us that it contained 36,000 houses of merchants, the half of which belonged to the Buddhists, and the other half belonged to the Jainas shown forth in

the middle as a row of magnificent buildings.1 Buddhaghosa, too, mentions Rājagaha as a city, the inner and outer areas of which contained each nine crores The Pali scholiast says that the city was surrounded by a wall (pākāra) and an under-world (petaloka). He associates the hot springs only with the Vebhāra mountains, though they are to be found also in the Vipulagiri and in a place called Tapoban. According to the Great Epic the men of all the four castes lived in the city. The Pali texts themselves introduce us to a good many Brahmins, Nobles and Traders,

We are not, however, to think that Rajagriha remained populous and prosperous throughout its history. Both Buddhaghosa and Dhammapāla tell us that this city suffered strange reverse of fortune. It was a city in the time of the Buddha or in the time of a king overlord, while at other times it became empty (deserted) and seized by the Yakkhas and stood as their forest abode.2 When Fa-Hien visited the place in the 5th century A. D. he found the sites still there as of old, but inside the city all was 'emptiness and desolation', no man dwelt in it.3 Plague (ahtvāta-roga) was a recurring pestilence of the place.4 The Karanda Venuvana monastery was 'still in existence', tenanted by a 'com-And at the time of Hwen Thsang's visit in the 7th century pany of monks '.5 A. D. 'the only inhabitants of the city were 1,000 Brahmin families', and many Digambaras lodged on the Pi-pu-lo (Vaibhāra) mountain and practised austerities incessantly.6

## 4 ANTIQUITY AND LOCATION OF THE FIVE HILLS

Traditionally Girivraja, the most ancient known capital of Magadha, was a well-fortified city in the midst of five hills.7 These hills were as impregnable as now for an invader to attack or enter the city. They are not named alike in the Mahabharata and the Pali works. Even in the Mahabharata itself they are not named alike. In the Pali works the names are the same, but they vary The first list in the Mahābhārata gives the names as: Vaihāra, Vārāha, Vrishabha, Rishigiri, and Subhachaityaka. The second list introduces the five hills as: Pāṇḍara, Vipula, Vārāha, Chaityaka, and Mātaṅga. Evidently, then, Vārāha and Chaîtyaka are the two names that are common to the two lists. The Pali Isigili-Sutta mentions the five hills in a definite order as: Isigili, Vebhāra, Pāndava, Vepulla, and Gijjhakūţa; or as: Vebhāra, Pāndava, Gijjhakūta, and Isigili, the two lists varying according as we begin with Isigili or with The order of five names is changed in the Pali commentaries, one of Vebhāra.

ı Vividha-tirtha-kalpa, p. 22: Sahairāh kil shadtrimiat yatrāsan banijām grihāh tatra ohārdhāh Saugatānām madhye charhatasamjilinam Yasya prasada panktinam śriyah prekshyatisayinih.

them enumerating them as: Paṇḍava, Gijjhakūṭa, Vebhāra, Isigili, and Vepulla.¹ and the other as: Isigili, Vepulla, Vebhāra, Paṇḍava, and Gijjhakūṭa.²

Stated in terms of the Jaina or modern names of the Rajgir hills, the north gate of Girivraja lies between the Vaibhāragiri and the Vipulagiri; the south gate between the Sonagiri and the Udayagiri; the east gate either between the Sonagiri and the Ratnagiri, or between the Udayagiri, on one side, and Chhathagiri and Sailagiri, on the other; and the west gate between the Vaibharagiri and the Sonagiri. The Vaibhāragiri lies to the west and the Vipulagiri to the east of the north gate. The Sonagiri lies to the west and the Udayagiri to the east of the south gate. The Ratnagiri, Chhathagiri and Sailagiri lie to the north and the Sonagiri and Udayagiri to the south of the east gate. Similarly the Vaibhāragiri lies to the north and the Sonagiri to the south of the west gate.3 If the palace area, as found enclosed by a triangular or quadrangular wall, be supposed to have been the whole of the Girivraja, as known in the Buddha's time and before, it must appear as a city with three gates and guarded not by five but by four hills only, namely, the Vaibhāra, the Vipula, the Ratna, and the Sona. If, on the other hand, the Chhathagiri4 or Sailagiri5 be identified with Gijjhakūta and the Udayagiri be precluded from the list of five hills, the south gate of Girivraja remains altogether unexplained, and the inclusion of Gijjhakūta in the list becomes unnecessary. Cunningham identifies the Pali Vebhāra mountain with the modern Vaibhāragiri, and D. N. Sen argues in favour of identification of the Pali Vepulla with the Vipulagiri and the Pali Pandava with the Ratnagiri. They say nothing definitely about the Isigili. If the Isigili be no other than the Sonagiri, we fail to understand why the Udayagiri should be left out of all consideration. One must, therefore, patiently consider the location of the five hills as suggested in Buddhist literature, the Pali canonical texts in particular.

Buddhaghosa rightly points out that in the Isigili Sutta the five hills are mentioned in the very order in which they stood to each other: Vebhāra, Paṇdava, Vepulla, Gijjhakūṭa, and Isigili.<sup>6</sup> In one of the Psalms of the Early Brethren, too, the Vebhāra and the Pāṇdava are mentioned as though they stood side by side.<sup>7</sup> In both the Mahāparinibbāṇa-Suttanta and the Vinaya Chullavagga, the Sattapaṇṇi or Sattapaṇṇa cave is placed on a slope of the Vebhāra mountain (Vebhārapasse), the Vaihāra which is described in the Mahābhārata as a 'massive rock' (Vipula Saila). The Pali Canonical texts and commentaries are silent as to the side of the hill on which the cave was actually situated. The Mahāvastu definitely locates the cave on the north side of the Vaihāra hill and on that spot where the flat rocky floor was beautifully covered with trees.

<sup>1</sup> Sutta nipita Commentary, II, p. 382.

Sir John Marshall inclines to identify Gridhrabuja with Chhathagiri.

<sup>&</sup>lt;sup>2</sup> Cunningham proposed to identify Gridhraküfa with Śailogiri.

<sup>4</sup> Majjhima-nikaya, III, p. 68.

<sup>7</sup> Theragatha, V. 41.

Fa-Hien does not name the hill but certainly means the Vaibhāragiri¹ on the north of which he found 'the cavern called Srataparṇa.' Hwen Thsang locates the cave in the same way on the north side of what he calls Pi-pu-lo mountain, by which he, no doubt, meant the Vaibhāragiri.² Both Buddhaghosa and Hwen Thsang identify the main hot springs of Rajgir with this very hill. Thus it may be almost decisively established that the Pali Vebhāra mountain is no other than the Vaibhāragiri in the valley of which was the city of Rājagriha or Kuśāgrapura.³

According to the Isigili-Sutta, the Pandava was the hill which stood next to the Vebhāra, and the Vepulla stood next to the Pandava. That is to say, the Pandava occupied the same position in relation to the Vebhara as the Jaina Vipulagiri or Vipula parvata. No doubt there is a verbal correspondence between the two names, Vepulla and Vipula. As a matter of fact, both the spellings of the name are met with in Pali. In one of the gathas in the Samyutta-nikaya, the Vipulagiri is praised as the best of the Rajgir hills (Vipulo Rājagahīyānam giri settho pavuchchati).4 In another gatha, the Vepulla is said to have been called a massive hill (akkhāto Vepullo pabbato mahā).5 But even these do not decide the issue. For, in the first place, the Mahābhārata applies vipula śaila as an epithet to the Vaihara mountain; secondly, the Lalitavistara speaks of the Pandava as the best of the Rajgir hills (parvataraja),6 and thirdly, Hwen Thsang applied the name Pi-pu-lo (Vipula) mountain evidently to no other hill than the Vaibhāragiri. In seeking to identify the Pandava with Ratnagiri, D. N. Sen relies upon a statement in the Sutta-nipāta-Commentary to the effect that the Pandava hill could be reached by the Bodhisattva by coming out of the city of Rajagaha by the east gate. But we saw that this is not warranted by the text itself which, like the Jātaka Nidāna-kathā, remains silent about the gate by which the Bodhisattva entered and came out of the city.

The Sainyutta-nikāya locates the Vepulla mountain to the north of the Gijjhakūṭa and places it in the midst of the girdle of hills. If the Vepulla be identified with the Vipulagiri and the Gijjhakūṭa either with the Chhaṭhāgiri or Sailagiri, it may be shown that it lies to the north of the latter, but it cannot certainly be shown that the Vipulagiri has its place in the midst of the girdle of hills (giri-parikkhepe). The Vepulla and the Gijjhakūṭa must have been the hills that enclosed between them the whole of the east gate of Rājagaha which extended over a distance of five or six miles, i.e., up to the modern Gridhradvāra cave.

Let us briefly consider the testimony of the Chinese pilgrims. First, when Fa-Hien visited Rājagriha, Girivraja was empty and desolate and no man dwelt in it. He took for his guides two bhikshus who were long residents of the place. He had to keep along the mountains on the south-east and proceed fifteen li

<sup>&</sup>lt;sup>4</sup> Lalita-ristara, Lefmann's Ed., p. 239.

(2½ miles) before he could reach the foot of Gridhrakūţa, which he knew to be the highest of all the five hills. Below the summit and apparently on the north side was a cavern or rocky apartment facing the south, in which Buddha sat in meditation. Near by to the north-west from this, was another cavern, where Ānanda sat in meditation and Māra Pisuna came to frighten him in the disguise of a vulture. There were 'caverns also of the Arhats', several hundred in all. In front of the Buddha's rocky apartment was the place where the Master used to walk from east to west. One could see the very rock which Devadatta hurled at the Buddha "from among the beetling cliffs on the north of the mountain."

Hwen Thsang had to walk 14 or 15 li (21 miles) north-east from Girivraja to reach the Gridhrakūta or 'Vulture Peak mountain' which was 'continuous with the south side of the north mountain'. The north mountain was apparently the mountain which lay to the north of Gridhrakūta. Mt. Gridhrakūta 'rose to a great height, blending with the empyrean'. Its summit was a perch for vultures, and was 'like a terrace'. There was a road from the foot to the top made by king Bimbisara. The top was 'elongated from east to west, and narrow from north to south'. Close to a cliff on the west side was a magnificent brick hall, opening to the east. To the east of this hall was a large stone, an exercise place of the Buddha, and at its side a rock, about 14 feet high and above 30 paces in circumference, where Devadatta hurled a rock at the Buddha. To the south of the temple, and at the side of the cliff, was a large cave in which the Buddha once sat in samadhi. North-west from this was another cave, with a large flat stone, in front of which Mara in the guise of a vulture threatened Near the temple were caves in which Săriputra and other Arhats went into samādhi.2

None of these two accounts shows that the Chinese pilgrims meant to connect the Gridhrakūṭa with the northern range of Rajgir hills. Fa-Hien found it along the mountains on the south-east, and Hwen Thsang found it continuous with the south side of the mountain to the north of it. One cannot possibly say that even at a distance of  $2\frac{1}{2}$  miles the Gridhrakūṭa was continuous with the Jaina Vipulagiri. The presence of caves need not worry us in identifying the Gijjhakūṭa of the Pali texts. For there is hardly any Pali reference to caves on this mountain. But there are a few other facts that need our consideration.

The Pali texts suggest proximity of the Gijjhakūṭa to a Paṭibhāna-kūṭa or 'Echoing peak'. According to Buddhaghosa, the latter was a boundary rock (mariyādapāsāṇa). The peak at the eastern end of the Sonagiri may be veritably regarded as the Paṭibhāna-kūṭa of Pali literature. Secondly, the Vinaya Chullavagga suggests the existence of a western shade of the Gijjhakūṭa which lay between the two peaks that stood very close to each other. The southwestern corner of the Udayagiri and the south-eastern corner of the Sonagiri answer well to this description. Thirdly, the Udumbarika-Sutta suggests the existence of a famous tank called Sumāgadha, with a peacock's free feeding ground

<sup>1</sup> Legge's Fa-Hien, pp. 82-83.

<sup>&</sup>lt;sup>2</sup> Watters' Yuan Chwang, II, pp. 151-152.

on its banks, in proximity to the Gijjhakūṭa. The landed estate of Udumbarikā devī lay not far from it. Fourthly, the Samyutta-nikāya suggests proximity of the Gijjhakūṭa to the river Sappinī which is, perhaps, no other than the modern Panchāna. Sixthly, the Deer Park at Maddakuchchhi or Adrikukshi is another ancient site which is located in the immediate neighbourhood of the Gijjhakūṭa¹ mountain. Seventhly the Sāmañnaphala-Sutta records a nocturnal visit of king Ajātasattu to Jīvaka's Mango-grove without any reference to the Gijjhakūṭa.¹ But Buddhaghosa locates the Mango-grove between the Gijjhakūṭa and the citywall.² Fa-Hien found it at the north-east corner of the (old) city in a (large) curving space, without any reference to the Gridhrakūṭa.³ Hwen Thsang, too, makes no reference to the Gridhrakūṭa when he locates the mango-grove in a bend of the mountain wall, 'north-east from Srīgupta's Fire-pit'.⁴

Lastly, the Majjhima-nikāya refers to the Kāļasilā or 'Black Rock' on a slope or side of the Isigili which stood so near the Gijjhakūṭa that it was possible for the Buddha to watch from the latter the action of certain persons on the former.

All these particulars cannot be properly explained if the Gijjhakūṭa is not identified with the Udayagiri and connected with the southern range of the Rajgir hills.

As for the antiquity of the five hills, it is stated in the *Isigili-Sutta* that all the hills except the Isigili had different names in different ages.<sup>5</sup> The *Samyutta-nikāya* mentions, for instance, the case of the Vepulla mountain. This mountain was known in a very remote age by the name of Pāchīnavamsa, and the people of the locality were known as Tivaras. In the next stage the mountain received the name of Vankaka, and the people of the locality were called Rohitassas. In the third stage the name of the mountain changed into Supassa and the name of the people of the locality became Suppiyas. And in the fourth or last stage the mountain became known as Vepulla, and the people of the locality were known as Māgadhakas.<sup>6</sup>

Both the Samyutta-nikāya and its commentary pre-suppose a long period in accounting for the geological evolution of the Rajgir hills. With reference to the Vepulla, for instance, we are told in the text that if a person is born and reborn during an aeon, leaving his bones to be heaped up in one place, the accumulation may be equal to the size of the Vepulla mountain. Buddhaghosa

adds that the period covered by the evolution of invertebrates is much longer than that of evolution of the vertebrates. The history of the Vepulla mountain is to be traced from an intermediate period when the vertebrates proper had not appeared on this earth.<sup>1</sup>

## 5 RĀJAGRIHA IN RELIGIOUS HISTORY

The primitive religion of Rājagriha was no other than that which prevailed all over the kingdom of Magadha. It consisted chiefly in the worship of Nāgas, Yakshas and other minor deities.<sup>2</sup> Buddhaghosa speaks of the existence of a beautiful and spacious Nāga-world under the *Vebhāra* mountain.<sup>3</sup> The Mahābhārata refers to the temples of two Pannagas or Nāgas, namely, Maṇināga and Svastika, in Girivraja.<sup>4</sup> The Maniyār Maṭh, now exposed to view by the Archaeological Department,<sup>5</sup> is really the temple of *Maṇināga* mentioned in the Great Epic.

As regards the Yakshas, we have, in the first place, mention of a Yaksha named Sīvaka (Sīvaka), who guarded the Sītavana or Cemetery-grove. The demi-god is described as a being who possessed supernatural powers and could produce supernatural phenomena at his sweet will.<sup>6</sup> Next we have mention of a Yaksha named Indaka (Indraka) whose dwelling was on a peak called Indakūṭa.<sup>7</sup> Sakka (Sakra, a Mārakāyika demi-god) figures as another Yaksha who dwelt on Mt. Gijjhakūṭa.<sup>8</sup> The Yaksha Maṇibhadda (Manibhadra) was worshipped at a shrine in Magadha, called Maṇimālaka-chetiya.<sup>9</sup> The Mahāsamaya Suttanta mentions Kumbhira (elsewhere, Gambhīra) as a Yaksha-chief of Rāja-gaha whose dwelling was on Mt. Vepulla.<sup>10</sup>

Among other minor deities of Rājagaha who were of a benevolent kind, the Devaputta-Samyutta introduces us to Asama, Sahalī, Nimka, Ākoṭaka, Veṭambarī, Māṇava-gāmī and Dīghalaṭṭhi who were upholders of various higher religious doctrines that were promulgated in the royal city. The early records of Buddhism clearly attest that the hills of Rājagaha were, according to the popular belief then prevalent, visited from time to time by such higher deities and angels as Sakka (Sakra) and Sahampati Brahmā (So'hampati Brahmā). The Sakka-pañha-Suttanta contains a romantic account of a visit of Sakka with his harper Pañchasikha Gandhabbaputta to the Indasālaguhā at the Vediyaka mountain when the Buddha was sojourning there. 12

The stucco-images found around the Maniyar-Math in the inner city of Rajagriha consist of the following figures:-

- "(1) Linga, covered with a garland of flowers, standing on circular base, moulded in the shape of a flower-pot.
  - (2) Bānāsura, standing, four arms, two upper hands cut off, two lower ones resting on shoulders of small male and female attendants. Crown on head; hair arranged in curls, garland over left shoulder. Conventional rock-work on base points to his residence in hills.
- (3) Naga, Head covered by cobra with five hoods, left hand falls down holding undefined object like a śańkha or shell, uplifted right with
- (4) Naga, cobra with many hoods over head, left hand, resting on hip, holds water-pot, right hand hangs down with palm opened (varada-
- (5) Nagi, cobra with three (or five?) hoods over head, right hand uplifted, left hand hangs down.
- (6) Ganeśa, Seated on rocks, holds mango (?) in his right hand, both upper arms wear bracelets, strings of beads around neck and forehead, three headed cobra twisted around his body.
- (7) Naga. Erect; head covered by cobra with three hoods; uplifted right hand holds rosary, left hand hangs down.
- (8) Nāga. Erect; head covered by cobra with one hood; gesture of uplifted right hand vitarkamudrā; left hand resting on hip.
- (9) Naga. Erect; cobra with three hoods over head; left hand hanging down; right hand raised.
- (10) Siva. Dancing; six arms; wears cobra and tiger-skin; phallic emblem distinctly visible."1
- (11) One stone-sculpture from Rājagriha, presents on one side standing figures of eight Vāsukis, the head of each of whom bears a cobra hood, and on the other, two standing human figures, with a Brahmi inscription of a very ancient date.2 (Plate IIb) Regarding the above figures (I to 10) the following observations of Bloch are worth quoting:

"It will be observed that among the divinities in the list, there is one at least, Bāṇāsura, whose name occurs in connection with the Krishna legends. Krishna once had a fight with him, because he had refused the hand of his daughter to the divine hero, and it was in this fight that Baṇasura lost two of his hands. Now, considering the intimate connection that exists between the Krishna legend and old Rājagriha, it is perhaps not too hazardous to suggest that the building unearthed, situated almost right in the centre of the old city, was some kind of Pantheon of Rājagriha, and that the various figures of nāgas and nāgīs represent certain serpent-deities, whom popular religion worshipped at distinct places on

<sup>&</sup>lt;sup>1</sup> From the list published by T. Bloch in A. S. I., Report for 1905-6, p. 104.

<sup>&</sup>lt;sup>2</sup> [This has since been reconstructed from fragments recovered in different years and the inscriptions reveal the names Mani-naga and Bhagini Sumagadhi.-Ed.]

the surrounding hills. The fact that some of the divinities have been represented as inhabiting hills, to which we have drawn special attention in the list above, fits well into this argument. Old ruined temples of Gaņeśa and Śiva (Mahādeva) still remain on Vaibhāra-giri, and it is merely owing to our imperfect knowledge of Hindu mythology, that we have been constrained to describe the six serpent-deities in the list merely as nāgas or nāgīs, without calling them by their proper names. One among them very likely is the nāga Maṇikāra, whose name still survives in the modern world Maniyār Maṭh, by which the locality now goes." 1

Rājagriha was popularly known to have been so much under the influence of such malevolent spirits as Nāgas and Yakshas that even the Buddhist Bhikshus had to be furnished with a Paritta or 'Saving chant' in the shape of the Mahā-āṭānāṭiya-Suttanta for their protection against them.

Indian literature is wanting in evidence as to the prevalence of fetishism in Rājagriha at any period of its history. The Sutta-nipāta and its commentary refer to an ancient place of worship (devaṭṭhāna) in Magadha-khetta, known as Pāsāṇaka-chetiya (Rocky shrine). It is possible that a holy stone on this rock was then the actual object of worship. The Guṇasila-chetiya mentioned in the Jaina Uvāsagadasāo was undoubtedly a primitive object of worship of this very description.

The Tapodas or hot springs and the Tapoda or Sarasvati carrying water from those hot springs were popularly regarded as punyatīrthas or places for holy ablutions. Thus those hot springs and hot streams served to make Rājagriha a place of pilgrimage to the Hindu folk in general, then as now. The Chinese pilgrim bears a glowing testimony to this in the following words:

"The fountain stream flowed in 500 branches past the Small Hot wells, and this made the water of the springs hot. All these springs had carved stones such as heads of lions or white elephants,3 or they had stone aqueducts to lead the water into the tank made of stone slabs. People came from various lands to bathe in these tanks, and often went away healed of old maladies."4

The hot springs of Rājagriha survive till to-day. They are found, as Cunningham records, on both banks of the Sarsuti rivulet; one half at the eastern foot of Mount Baibhār, and the other half at the western foot of Mount Vipula '.5

The Pippalas (Aśvatthas) and Nyagrodhas were the sacred trees at the place as in other parts of India. The Gotama-nigrodha was the most famous banyan tree of Rājagriha. The supaitṭṭha and the Bahuputtachetiyas were two other holy banyan trees on the outskirts of the city.

As for Brahmanism, we saw that the Mahābhārata invests Rājagriha with hoary antiquity and describes it as the place where lived such ancient Vedic sages and seers as Dîrghatamas, Gautama, and Kākshīvān. The Great Epic faithfully depicts the hills of Rājagriha as places which were suitable retreats for many

siddhas and tāpasas.1 The Pali commentaries speak of Rājagriha as a residence of such holy personages of old as Mahagovinda and Mandhātā.2

The Pali Isiqili-Sutta represents Rishigiri ("the Hermits' Hills") as Isiqili (Rishigili) or the hill which, according to popular impression, swallowed up the isis (rishis). The local people could see when those hermits entered the hills but never saw them coming out of it. So another impression was that those hermits dwelt in it for ever (chira-nivāsino). The hermits are honoured in the Sutta as pachcheka-buddhas or Buddhas who had attained siddhi for their own good only. Mt. Rishigiri or Rishigili was associated with a tradition of five hundred rishis who came to live in it for ever. The Pali Sutta mentions a good many of them by name: Aritha, Uparitha, Tagarasikhi, Yasassi, Sudassana, Piyadassi, Gandhāra (a rishi whose birth-place was probably Gandhāra), Pindola, Upāsabha, Nitha, Tatha, Sutavā, Bhāvitatta, Sumbha, Subha, Methula, Atthama, Sumegha, Anigha, Sudātha, Hingū, Hinga, two Jālis, Atthaka, Kosala (probably one from Kosala), Subāhu, Upanemi, Nemi, Santachitto, Kāla, Upakāla, Vijita; Jita, Anga (apparently one from Anga), Panga, Gutijjita, Aparājita, Satthā, Pavattā, Sarabhanga, Lomahamsa, Uchchangamaya, Asita, Anasava, Manomaya, Bandhuma, Tadadhimutta. Ketumbarāga. Mātanga, Ariya. Achehuta, Achchutagāmabyāmaka, Sumangala, Dabbila, Supatitthita, Asayha, Khemābhirata, Sorata, Durannaya, Sangha, Ujjaya, Sayha, Ananda, Nanda, Upananda, 12 Bhāradvājas, Bodhi, Mahānāma, Uttara-Bhāradvāja, Kesī-Bhāradvāja, Sikhi-Bhāradvāja, Sundara-Bhāradvāja, Tissa, Upatissa, Upasīdarī, Sidari, Mangala, Usabha, Upanita, Uposatha, Sundara, Sachcha, Jeta, Jayanta, Paduma, Uppala, Padumattara, Rakkhita, Pabbata, Mānatthaddha, Sobhita, and Kanha.3 One may readily agree with Dr. Barua in thinking that Mt. Isigili was hallowed by the death of these holy personages.4

Coming to the Buddha's time, we find that Rajagriha was surrounded by many Brahmin villages or settlements. Ekanālā was an important Brahmin village in Dakkhinagiri.5 Ambasanda was another Brahmin village on the eastern side of Rājagriha, to the north of the Vediyaka mountain and the Inda-On the landed estate of Udumbarikā devī, not far from the Sumāgadha tank, was a Paribbājakārāma or retreat of the Wandering ascetics,7 with Nigrodha (Nyagrodha) as their leader. Not far from this, on the bank of the river Sappinī (Panchāna) was another ārāma, where great Wandering teachers,8 Annabhāra and Varadhara and Sakuladāyī lived. Khānumata was a prosperous Brahmin village in Magadha, which was made a gift to the Brahmin Kūṭadanta by king Bimbisara. This was the place where the Brahmin lived with all the powers over life and property as if he were the king himself. Annually a great

sacrifice was made involving the slaughter of hundreds of bulls, calves, goats and rams. The great sacrifice, performed every year by the three Jatila leaders of the Gaya region, was a highly important religious function awaited by the inhabitants of Anga-Magadha.2

The Brahmins who lived in Rajagriha and near about it were mostly Brahmins of the Bhāradvāja-gotta. Some of them were agnihotris, some upholders of the cult of purity by birth, morals and penance. Some of them wore matted hair (jatā) and some of hot temper. They were generally opposed to the conversion of any one amongst them to the Buddhist and such other non-Brahmanical faiths.3 Even at the time of Hwen Thsang's visit, when there was none else in the deserted city, there were one thousand Brahmin families.4 Rājagriha was once visited by a Wanderer (paribbājaka), named Moliya-Sīvaka.5 female wandering ascetic (paribbājikā), called Suchimukhī (Needle-mouth) was well-known to the citizens of Rājagṛiha, apparently for the sting in her words.6

There lived in some of the villages in Magadha a class of heretics, called Samsāra-mochakas or 'Saviours of the souls from the states of woe,' who, as their name implies, were professionals enough to guarantee the release of departed spirits from the course of transmigration by their secret cults and occult powers.7

Somewhere in Magadha, between Rajagriha and Uruvela (Buddha-Gaya), not far from the Mahanadi (Mohana) lived two teachers, Arada Kalama and Udra Rāmaputra, who founded two schools for the training of pupils in the method of yoga.8

Rājagriha was the earliest known stronghold of heresy and heterodoxy of the age.9 The early records of Buddhism bring before us six powerful teachers, Pūrana Kassapa, Makkhali Gosāla, Pakudha Kachchāyana, Ajita Kesakambalī, Sanjaya Belatthiputta, and Nigantha Nataputta, who proved to be founders of schools (titthakaras) and great leaders of thought. The first of them is described as a propounder of the doctrine of chance, the second as a fatalist, the third as an eternalist, the fourth as an atheist, the fifth as a sceptic, and the sixth as an advocate of the fourfold restraint (chātuyāma-samvara).10 Makkhali Gosāla was the leader of the Ajīvikas, and Nigantha Nātaputta that of the Nirgranthas or Jainas. These teachers had each his great admirers and staunch supporters among the citizens of Rājagriha, the benevolent spirits of the place not excluded.11 The beginnings of their career are bound up with the history of Rajagriha.

One Sañjaya Parivrājaka resided at Rājagriha with five hundred followers. Sāriputra and Maudgalyāyana who became the chief disciples of the Buddha after their conversion to the new faith belonged formerly to the school of Sanjaya.1 In the Mahāvastu Sanjaya is represented as Sanjaya Vairātiputra, i.e., Sanjaya the Sceptic.2

Rājagriha and its neighbourhood have a considerable importance in the history of Jainism. For it was in Nālandā, a suburb of Rājagriha, that Mahāvīra spent the second year of his asceticism. It was again in Rājagriha and Nālandā that he found his early supporters in such rich householders as Vijaya, Ānanda, Sudarśana and Bahula. Gosāla, the leader of the Ajīvikas, saw and met him first in Rajagriha. The settlement of Kollaga (Konnaga), and the village of Bālaka at some distance from Nālandā, were places that became scenes of his early action. 3 The Kalpa-Sūtra informs us that in Rājagriha and Nālandā Mahāvīra spent as many as fourteen rainy seasons.4 But Rājagriha was also known as the birth-place of Muni Suvrata, one of the predecessors of Mahavīra.5 Eleven out of the twelve ganadharas or leading disciples of Mahāvīra attained nirvāna (i.e., died) in Rājagriha.6

The Pali Nikāyas refer to Kālasilā or Black Rock on a slope or side of Isigili as the place where the Nirgranthas or Jaina recluses were seen practising the difficult penance of remaining in a standing posture (ubbhatthikā), rejecting seats (āsana-paṭikkhittā).7 This Kālasilā was, perhaps, no other than what is called the site of Gunasila-chaitya in the Jaina Uvāsaga-dasāo. When Hwen Thsang visited Rājagriha in the 7th century A.D., he saw many Digambaras on the Pi-pu-lo (Vaibhāra) mountain, who lodged there and practised austerities incessantly turning round with the sun, watching it for the whole day.8

The earliest known Jaina inscription is the one on the pedestal of a Jinaimage recording the name of Mt. Vipula and king Śrenika in a Brāhmī alphabet which may take us back to the Kushana age.9 The Jainas built small temples on almost all the hills of Rajgir, installing the images of the Tirthankaras in them in comparatively modern times, and these still exist. They have located Pāpāpuri, (or Pāvāpuri, as it is called) the place of Mahāvīra's demise, near Rājagriha, on the Bihar Sarif-Nawadah road.

Prince Abhaya figures in the Pali Nikāyas as a strong lay-supporter of the order of recluses founded by Mahāvīra.10 According to Jaina tradition, among the sons of Śrenika (Bimbisāra), Abhaya, Halla, Vihalla, and Nandisena were lay

adherents of the Jaina faith.1 It is quite natural that there existed some amount of rivalry between the Jainas and the Buddhists.

The Pali Nikāyas refer also to Pāvārika's Mango-grove at Nālandā as the place where Mahāvīra figured as a very popular and venerable personality. One Dīghatapassī, a Jaina recluse of the time, resided there. Upāli, a rich householder of the locality, played the role of a sāvaka or lay worshipper of the great Tīrthań-kara.<sup>2</sup> Lepa was another rich householder of Nālandā to figure among the Jaina sāvakas.<sup>3</sup>

Rajagriha assumes altogether a new aspect in the history of Buddhism, and the account of this ancient city and its neighbourhood is nowhere else so full, bright and vivid as in the Buddhist records. Rajagriha was the first place visited by the Bodhisattva after his adoption of ascetic life at Anupriya in the Malla territory. It was here that he begged his food for the first time from door to door and created a high impression on the mind of king Bimbisara and the citizens by his charming personality.4 It was somewhere in Magadha, between Rajagriha and Uruvela that he met and placed himself under the training of Arāda Kālāma and Udra Rāmaputra in the method of yoga.5 He eventually selected Uruvela as the most fitting place for meditation and the attainment of Buddhahood. Shortly after the attainment of Buddhahood it was suggested to him that his was primarily the task of a reformer of the religions of Magadha that had become all corrupt.6 His second notable triumph in the kingdom of Magadha was the conversion of the three great leaders of the Jatilas with their thousand followers. With all of them as new converts he proceeded towards Rajagriha and halted on the way at Latthivana or Yashtivana, which was a beautiful palm-grove or stick-wood belonging to king Bimbisara. He was received with ovations by all the citizens of Rajagriha and the inhabitants of Anga-Magadha, headed by king Bimbisāra.7

The conversion of the king to the new faith proved to be a great incentive to the people at large to welcome it. King Bimbisāra made a gift of his Bamboo grove, Veluvana-Kalandaka-nivāpa (Kalanda Veņuvana) to the Buddha among his disciples, the grove which was situated in the outer area of Rājagṛiha, neither very far nor very near and yet at the same time a calm retreat most favourably situated.<sup>8</sup>

The conversion of Sāriputra and Mahāmaudgalyāyana to the new faith by the Venerable Aśvajit, and the consequent desertion of the school of Sañjaya the Wanderer must have created a sensation among the citizens of Rājagriha.<sup>9</sup>

Conversion followed upon conversion. Persons of many well-known families either became bhikshus or lay supporters of the new doctrine, the progress of which was phenomenal in spite of resentment and petty opposition here and there, among different sections of people of the locality. For want of accommodation in Venuvana, the bhikshus passed the nights in grottoes and caverns of the hills that surrounded the city. This induced the great Banker of Rajagriha to undertake, with the permission of the Buddha, to build in a day some sixty vihāras for them. Another notable conversion which took place thereafter was that of Mahākāsyapa1 who belonged formerly to another religious sect. With the formation of the order of bhikshunīs at Vaiśālī, many women of Rājagriha, headed by Kshemā 2 one of the gifted queens of Bimbisāra, joined it. The Brahmins who as a class were opposed to the idea of conversion to the Buddhist and other non-Brahmanical faiths, the nobles who had generally an open mind to discuss all matters of human interest and importance, the bankers and traders who were charitably disposed to support religious and educational institutions, and the masses who struggled for existence, were contributory factors to the growing drama of Buddhism, the artisans, courtiers, physicians, royal officers and courtezans not excluded.3

It was at Rājagriha that Sudatta-Anāthapindika, the great banker of Śrāvastī met the Buddha and invited him with all his disciples to the capital of Kosala.4 It was again at Rājagriha that the messenger from Kapilavastu came to invite the newly enlightened Master to revisit the place of his nativity. In short, though the dharma was publicly proclaimed at Benares, the influence of Buddhism really spread from Rājagriha.

Though Mt. Gridhrakūţa was a favourite resort of the Buddha and the Pippali-guhā that of the Venerable Mahākāsyapa, there was hardly any place of importance in or about Rājagriha which was not hallowed by the presence of the Buddha. The Sîtavana or Cemetery grove and the Sappasondika-pabbhāra or Snake-hood-like slope, the Tapodarama or Hot-water retreat, the Tapodakandarā or Hot-water cavern, the Gomața-kandarā, the Kapota-kandarā, the Latthivana or Yashtivana, the Sattapanni or Sattapanna cave on a slope of the Vaibhāra hill, the hollows and caverns of the Vaibhāra and Paṇdava hills, the Deer park at Maddakuchehhi, the Black Rock on a slope or side of Mt. Isigili or Rishigiri, the Patibhāṇakūṭa or Echoing Peak, the Indrakūṭa associated with the tradition of Indra yaksha, Jīvaka's Mango-grove, the Brahmin village Ekanālā in Dakshinagiri, the Pāsāṇaka-chetiya or Rocky Shrine, the Indasāla cave in the Vediyaka hill near the Brahmin village Ambasanda or Mango-tracts, the Sumagadha Tank with the Peacocks' feeding-ground, the retreat of the Wandering ascetics on the landed estate of Udumbarikā devi, the banks of the river Sappinī

<sup>1</sup> Pindola-Bhāradvāja, one of the Budūha's foremost disciples, was born at Rājagaka in a rich brahmin family. The theras Chullapanthaka and Mahapanthaka were grandsons of Dhanasetthi, a banker of Rajagaha. The Chitrakathi Kumarukassapa was born at Rājagaha, (Vide B. C. Law's Ancient Indian Tribes, p. 137).

<sup>&</sup>lt;sup>2</sup> See for the names of other bhikkhunis who were born in Rajagaha (Law, Ancient Indian Tribes, 133). Law, Ancient Indian Tribes, pp. 126 foll.

<sup>4</sup> Samyutta-nikaya, I, pp. 210 foll.

(Pañchāna), the village of Andhakavinda, the royal garden at Ambalaṭṭhikā on the way to Nālandā, Pāvārika's Mango-grove at Nālandā, Nālakagāma in the eastern part of Magadha, the Ambalaṭṭhikā near the Brahmin village Khānumata, and the spot of Maṇimālaka-chetiya or the shrine of Maṇibhadra yaksha which served as places of sojourn either to the Buddha or to his disciples grew into historical sites for various Buddhist monasteries or retreats, large or small.

The shady slopes and caverns of the hills around Rājagṛiha, all solitary nooks and corners were found fitting places for lonely meditation of the bhikshus and bhikshunīs, the theras and therīs. It was in some of those lonely retreats that the bhikshus and bhikshunīs chanted the formulated doctrine and discipline of the Buddha, even in the very life-time of the Master.¹ The sombre beauty of the hills and the retreats was thus praised by the Buddha. "Delightful, Ānanda, is Rājagaha, delightful is the Gijjhakūṭa mountain, etc."² The Vinaya account goes to show that it was gradually found convenient to fix up residences (senāsana) for the bhikshus, dividing them into different groups according to their affinity in religious outlook and interest, namely, the Suttantikas, the Vinayadharas, the Dhammakathikas, the Jhāyinas (contemplatives), and the Tirachchhānakathikas or Non-descripts.³

Rājagriha was one of the three places selected by the Chabbaggiyas (Shadvargikas) of Vinaya notoriety, for planting centres of their mischievous activities. Rājagriha was again the place where Devadatta fell out with the Buddha, tried to do personal harm to him, fomented schism in the Sangha, and eventually created a division in it.4 It was from Rājagriha that the Buddha started his last journey to Kuśinārā, stopping on the way at Ambalatthikā, Nālandā, and Pāṭaligāma, and delivering fruitful discourses to all who came in contact with him.5 It was also the place where king Ajātaśatru built a stūpa and ceremonially enshrined in it the portion of relics received by him from Kuśīnārā.6 But Rājagriha is certainly famous in the history of Buddhism also as the place where five hundred distinguished Theras met under the leadership of the Venerable Mahākāśyapa to recite the doctrine and discipline of the Buddha and fix the Buddhist canon. All later traditions, whether in Pali or Sanskrit, tell us that the First Council was convoked in front of the Saptaparni or Saptaparna cave on a slope of the Vaibhāra or Vaihāra hill, and that under the auspices of king Ajātaśatru who constructed a suitable mandapa for the purpose. These statements are not, however, borne out by the account of the First Council as contained in the Vinaya Chullavagga, Section XI. The Vinaya account distinctly says that the main reason for selecting Rajagriha for the purpose was that it could afford spacious accommodation for the five hundred Theras who were to recite the doctrine and discipline during the Buddhist Lent.

What actually happened to the Sangha at Rajagriha as a consequence of the transfer of capital to Pățaliputra, we cannot precisely say. But the glimpses that we have, here and there, show that the process of history was one of decay. Hwen Thsang, of course, tells us that 'two or three li to the north-west of this (the Kalanda Tank to the north of the Venuvana monastery) was an Aśoka tope beside which was a stone pillar, above 50 feet high, surmounted by an elephant, and having an inscription recording the circumstances of the tope'.1 The circumstances that led to the erection of the tope at Rajagriha by Aśoka are also narrated by the Pali scholiasts and chroniclers. The Mahavamsa says that the Venerable Indagutta (Indragupta) went from all places around Rajagriha as a representative to take part in the grand celebration of a Mahathupa in Ceylon during the reign of king Dutthagamani (2nd century B.C.).2 When Fa-Hien visited Rājagriha in the 5th century A.D., he found the Karanda Bamboo-garden, where the old vihāra was then in existence, with a company of monks, who kept the ground about it swept and watered.3 But Hwen Thsang met none there at the time of his visit in the 7th century A.D. deserving of mention in his Travels. As some of the images recently discovered at Rājagriha indicate, there was some amount of new vigour in Buddhist activities at the place under the patronage of the Pāla kings, after which the history of Buddhism at Rājagriha became practically closed for ever.

## 6 ARCHITECTURE OF RAJAGRIHA: SECULAR AND RELIGIOUS

The material that may be gathered from Indian literature regarding the architecture of Rajagriha is very scanty. As for secular architecture, the main object of interest, whether in the inner or in the outer city of Rajagriha, was, of course, the palace. Both the lower and the upper storey of the palace are mentioned, from which it may be inferred that it was at least a two-storeyed building.4 It was certainly enclosed by a wall with gates.

According to Buddhaghosa, the city of Rajagriha was provided with 32 main and 64 smaller gates.5

The Vinaya Chullavagga refers to a rich household of the Banker of Rajagriha. The Sāratthappakāsinī leads us to think that his residence was a sevenstoried building (sattabhūmaka-pāsāda), fitted with gates, main and minor.6

The Venuvana which was formerly a royal garden and subsequently converted into a Buddhist monastery was a beautiful bamboo-grove, surrounded by bamboos, enclosed by a wall, which was provided with gate-houses (gopurațtălakaquttam).

<sup>1</sup> Watters' Yuan Chwang, II, p. 162.

<sup>&</sup>lt;sup>2</sup> Pp. 227-228.

<sup>&</sup>lt;sup>a</sup> Legge, Fa-Hien, p. 84.

<sup>\*</sup> Sărathappakāsini, I, p. 313: mahādvārābhimukho va ahoni, sattabhūmakadvāram sayam eva vivaļam ahosi.

<sup>3</sup> Samanta-pāsādikā, III, p. 575: Tam kira veļūki parikkhittam ahosi attharasa-hatthena cha pākārena gopurattālaka-yuttan.

The rājāgāra or garden-house of Bimbisāra at Ambalaṭṭhikā, on the road from Rājagriha to Nālandā, is said to have been provided with shade and water, enclosed by a wall, fitted with strong doors, well-guarded like a box. It was here that a picturesque house was built for the delightful pastime of the king.<sup>1</sup>

At Nālandā the Jaina householder Lepa who was rich and prosperous 'had a bathing hall which was beautiful and contained many hundreds of pillars'.2

At Pāṭaligāma, in the heart of the township, was built a big hall by the local people, one part of which was set apart for keeping things and the other part for residence.3

Turning to religious architecture, there is no evidence to show that the additions were made to Venuvana when Bimbisara made a gift of it to the Buddha and his disciples.<sup>4</sup> As Hwen Thsang found it, the Kalanda Bamboo Park with the original lodging of stone and brick opened to the east.<sup>5</sup> It was most favourably situated in the outer city, neither very far nor very near the populous part of the city, and at the same time easily accessible and pleasantly peaceful.

The sixty vihāras undertaken by the Banker of Rājagriha to build for the bhikshus with the permission of the Buddha could not have been anything but-small huts or cottages. The guhās, kandaras, vivaras and pabbhāras were so many natural caves, caverns, hollows and projections in the rocks, generally not improved by human hand. The cave on the northern slope of the Vaibhāra mountain, to the west of the hot springs, is but a long serpentine grotto. The best example of rock-cut caves in Rājagriha is one afforded by the Son-bhānḍār cave which was formerly two-storied. Another small cave has been brought to view, just beside the Son-bhānḍār, and it is expected that a series of caves will be discovered on the southern side of the Vaibhāra mountain.

The Indasāla cave in the Vediyaka mountain which as a natural cavern in the rocks was narrow, dark, and uneven is said to have been much improved by human hand. "It was surrounded by a wall, fitted with doors and windows covered with *chunam* plaster, decorated with scrolls and floral designs, done up, on the whole, into a picturesque cave-dwelling when it was made over to the Blessed One."

In converting his Mango-grove into a vihāra and making a gift of it to the Buddha, Jīvaka got it enclosed by a copper-coloured wall, 18 cubits high and provided with sleeping places, lenas (cells), kūṭis (huts), maṇḍapas (pavilions),

<sup>&</sup>lt;sup>1</sup> Sumangala-vilāsinī, I, p. 42: Chhāyudaka-sampannam tam pākāra-parikkittam suyojitu-dvāram manjusā viya suguttam. Tattha ranno kiļanattham patibhānuchitta-vichittāgāram akamsu.

<sup>\*</sup> Sumangala-vilāsinī, III, p. 697: Atha nam huddehi parihkhipitvā dvāra-vātāpanāni yojetvā suparinitihita-sudhā-kamma-mālākamma-latākamma-vichittam lenam katvā Bhagavato adamsu.

etc., as well as a private chamber, gandhakūṭi, for the use of the Master.¹ A similar account is given by Buddhaghosa of the vihāra built by Pāvārika Seṭṭhi in his Mango-grove near Nālandā.² The manḍala-māla which was a nisīdana-sālā in Jīvaka's Mango-grove is represented in the Bharhut sculpture as an open-pillared hall with a gabled roof.³

The Mahābhārata clearly mentions the temples of Maṇināga and Svastika without giving us an idea of their structure or material. The Maṇiyār Maṭh now exposed to view 'bears a certain structural resemblance to the temples of Vesta at the Bocca della Verita in Rome and at Tivoli'. But this cannot be taken to be the original shape of the shrine. Inside the masonry roof has been found the seated image of a nāga, dated in Saṃvat 1547, 'along with a basalt slab, bearing the representation of two human feet on it', the charanapādukas of Nāga Sālibhadra, set up by a Jaina lady in Saṃvat 1837.4 The Gotamanigrodha, the Maṇimāla-chetiya, and the Bahuputta-chetiya were each a sylvan shrine, probably a typical banyan tree with some rude structure near it.

Buddhaghosa gives rather an exaggerated description of the  $st\bar{u}pa$  built by king  $Aj\bar{a}tasatru$  for hoarding the relics of the Buddha in one place. This description, as observed by Dr. Barua, is evidently coloured by, if not actually based upon, what he (Buddhaghosa) saw at Thūpārāma in Ceylon.<sup>5</sup> The underground structure of the tope need not be discussed.<sup>6</sup> As for the structure above the ground, we are told that a stone-mound was built to cover the  $st\bar{u}pa$  under the ground.<sup>7</sup>

<sup>&</sup>lt;sup>1</sup> Sumangala-viläsini, I, p. 133: Tasmim Ambavane ratti-ffhäna-divätthäna-lena-käti-mandapädini sampädetvä Bhugavato anuchchhavikam gandhahütim häretvä Ambavanam atthärasa-hatthubbedhena tambapatta-vannena päkärena parikkhipäpetvä Buddhapamukham bhikkhusangham...vihäram niyyädesi.
